

Dear Sir/Madam,

When submitting this application for IHET5AP2 the system gave additional PE2 prefix to our valid FCC ID which should be IHET5AP2. Since the time is important for us I would appreciate if this application could be reviewed and then grant issued for the valid IHET5AP2 FCC ID. If it is possible could you copy all files from PE2IHET5AP2 to IHET5AP2 which is correct ID written on all submitted pages. If not I could resubmit all files again. In this case I would need to pay all fees twice. Could you please then refund all fees paid for first incorrect application. Still I hope taking PE2 prefix could be fixed in an easier way rather than resubmitting all files. I will be waiting for further instructions.

Thank you,

Sincerely,
Zoran Husner
