RE: Attestation Statements 6PP Filing – FCC ID: SWX-U7PRO

We, Ubiquiti Inc., attest that this device under FCC ID SWX-U7PRO complies with device protocol requirements and operational restrictions: for indoor client 6PP.

1. Device Protocol Attestation Statement:

- a. Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent.
- b. This device will always be under the control of a low-power indoor AP and will only initiate brief messages to be under the control of an indoor low-power AP. These brief messages will only occur if the subordinate has detected a low-power indoor AP operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- c. Once under control of an indoor access point, a subordinate will initiate connections with clients, other access points, or other subordinate devices at a lower power or equal to the power advertised by the access point controlling the subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6PP.
- d. Resolution Limit Client Power determines the maximum power level allowed on client devices that associate to the Access Point.

2. Statement acknowledging device restrictions:

- a. This Access Point operates in the 5.925-7.125 GHz band. It is supplied power from a wired connection, has an integrated antenna, is not battery-powered, and does not have a weatherized enclosure.
- b. The operation of this device will not be allowed on oil platforms, cars, trains, boats, and aircraft, except that this device's operation is permitted in large aircraft while flying above 10,000 feet.
- c. Prohibited for control of or communications with unmanned aircraft systems, including drones.
- d. Has no direct connection to the internet.

Sincerely,

Alex Macon
Ubiquiti Inc.
