G VELUX Touch - Replacement of batteries
(type AAA, 1.5 V, non-rechargeable Alkaline or Carbon Zinc)

H VELUX Touch - Fitting to the wall
with magnetic holder

IMPORTANT INFORMATION

Read instructions carefully before installation and operation. Keep instructions for future reference and hand them over to any new user.

Safety

- VELUX Touch control pad KLR 300 can be used by persons (aged 8 years and above) with sufficient experience and knowledge if they have been given instruction concerning safe use and understand the hazards involved. Cleaning and user maintenance must not be done by unsupervised children.
- Children must not play with the control pad.

- The control pad must be installed at a height below 2 m, and it is recommended to place it in the room where the window and its electrical products have been installed.

Product

- The control pad is for indoor use only.
- The control pad has been designed for use with genuine VELUX INTEGRA® products.
- Radio frequency band: 868 MHz.
- Radio frequency range: up to 100 m free field. Depending on building construction, the indoor range is approx 10 m. However, constructions with reinforced concrete, metal ceilings and plaster walls with steel members may reduce the range.
- Expected battery lifetime: Up to 2 years.

- Disabling the rain sensor while the window is open implies a risk of rain water entering the building.
- The packaging must be disposed of in accordance with national regulations.
-  The product, including batteries if any, is regarded as electrical and electronic equipment and contains hazardous materials, components and substances. The crossed out wheeled bin symbolises that electrical and electronic equipment waste must not be disposed of together with household waste. It must be collected separately at recycling stations or other collection sites or retrieved directly from households to increase the possibilities of recycling, reuse and utilisation of electrical and electronic equipment waste. By sorting electrical and electronic equipment waste with this symbol, you contribute to reducing the volume of incinerated or buried waste and to reducing any negative impact on human health and the environment. Further information can be obtained from the local municipality's technical administration or from your VELUX sales company.

- If batteries can be removed, product and batteries must be disposed of separately.

Maintenance and service

- The control pad requires a minimal amount of maintenance. The surface may be cleaned with a soft, damp cloth.
- **CAUTION:** Risk of explosion if battery is replaced by an incorrect type.
- If you have any technical questions, please contact your VELUX sales company, see telephone list or www.velux.com.

io-homecontrol® provides advanced and secure radio technology that is easy to install. io-homecontrol® labelled products communicate with each other, improving comfort, security and energy savings.
