

This consummation notice is being filed to correct an administrative error that occurred when the approved assignment transaction was consummated and the FCC was notified of the consummation. The approved assignment of the Section 214 authorizations in IBFS File No ITC-ASG-20070212-00070 was a small part of a larger transaction for which the lead FCC application was ULS File No. 0002891680. When the entire transaction was approved, a consummation notice was filed on June 26, 2007 via ULS (*see* ULS File No 0002891680), stating a June 22, 2007 consummation date. The parties did not understand that a separate consummation notice would be expected with regard to the related Section 214 application, and none was filed. This inadvertent oversight is being corrected by this submission so that the license can be corrected to reflect PRWireless, Inc as the licensee of record.
