Answer to Questions 12 and 16

Applicants certify that Mexico is a WTO member country.¹ Iusacell owns domestic cellular facilities in Mexico. Iusacell owns no international facilities.

Pursuant to Section 63.10 of the Commission's rules, 47 C.F.R. Sect. 63.10, Applicants qualify for continued non-dominant classification on the route between the U.S. and Mexico because Iusacell has no market power on the foreign end of this route. Iusacell has market shares under 50 percent in all relevant markets on the foreign end of the U.S.-Mexico route, including the international transport and local access markets in Mexico, and is not listed on the Commission's List of Foreign Telecommunications Carriers that are Presumed to Possess Market Power in Foreign Telecommunications Markets. *See The International Bureau Revises and Reissues the Commission's List of Foreign Telecommunications Carriers that are Presumed to Possess Market Power in Foreign Telecommunications Markets*, Public Notice, 22 FCC Rcd 945 (2007).

¹ See http://www.wto.org/english/thewto_e/whatis_e/tif_e/org6_e.htm (listing WTO Members) (last visited Feb. 2, 2015).

Accordingly, pursuant to Section 63.10(a)(3), Applicants are presumptively classified as non-dominant on this route. Moreover, the Commission has previously determined that Iusacell lacks market power and is non-dominant on the U.S.-Mexico route. *See Applications of Bell Atlantic Communications, Inc. and Nynex Long Distance Company*, Order, Authorization and Certificate, 15 FCC Rcd 21,838, 21,844-45 ¶ 13 (1999); *see also Application of GTE Corporation and Bell Atlantic Corporation*, Memorandum Opinion and Order, 15 FCC Rcd 14,032, 14,219-20 ¶ 412 (2000).
