Question 5 – Countries of affiliation

By this filing, Fusion Connect, Inc. (“Fusion”) notifies the FCC of an affiliation with Primus Management ULC (“Primus ULC”) a foreign carrier in Canada.

Question 10 – Late notification

As appropriate, Fusion requests a waiver of the requirement that carriers notify the FCC of foreign affiliations within 30 days after closing. Fusion’s affiliation with Primus ULC resulted from a recently consummated transaction in which Primus ULC became an indirect, wholly-owned, subsidiary of Fusion. (*See* Application of Birch Communications, Inc. and Fusion Telecommunications International, Inc. for Consent to Acquire Control Pursuant to Section 214 of the Communications Act of 1934, as Amended, WC Docket No. 17-301, IB File Nos ITC-T/C-20171031-00201 and ITC-T/C-20171031-00202). Fusion’s failure to file within the specified timeframe was inadvertent. Fusion notes that it clearly qualifies for continued non-dominant treatment on the U.S. - Canada route and apologizes for any inconvenience resulting from its failure to file this notification in a timely manner.

Question 12.c.1 – Non-dominant carrier demonstration

Fusion is currently regulated as non-dominant on the U.S. – Canada route. Fusion requests that it continue to be regulated as a non-dominant carrier on this route pursuant to Federal Communications Commission rule 63.10(a)(3), 47 C.F.R. §63.10. Continued non-dominant treatment is appropriate on this route because Fusion’s foreign carrier affiliate, Primus ULC, operates in Canada, a World Trade Organization Member country, and holds less than fifty percent (50%) market share in the international transport and local access markets in Canada. Currently, Primus ULC: (1) controls less than 25 percent of the market; (2) competes against at least one other carrier that controls a majority of the international telecommunications market; and (3) lacks market power or facilities that would permit it to set market prices, control services or facilities, control market entry, or discriminate against unaffiliated U.S. carriers.

Question 16 – Appropriateness of continued non-dominant treatment

Continued non-dominant treatment is appropriate for Fusion on the U.S. - Canada route since Fusion’s affiliate on this route lacks market power in the international transport and local access markets in Canada, as demonstrated in the answer to Question 12.c.1 above.

Question 17 – Foreign carrier affiliates that are the subject of this Notification

By this Notification, Fusion advises the FCC that Fusion is affiliated with Primus ULC, a carrier authorized to provide telecommunications in Canada.

Question 18 – FCC authorizations and services authorized

Fusion holds international Section 214 authority to provide facilities-based and resold international telecommunications services. *See* File No. ITC-214-19971001-00592 (facilities-based service between the U.S. and all approved international points).

Question 19 – Countries served solely through resale of unaffiliated carriers

Fusion does not serve Canada solely through the resale of the international switched services of unaffiliated U.S. facilities-based carriers.
