Re: Surrender of International Section 214 Authorizations

Dear Ms. Dortch:

In order to reduce unnecessary recordkeeping by both the FCC and AT&T, AT&T is reviewing its files to identify and surrender international Section 214 authorizations that are no longer required to provide service. The ability to surrender the following international Section 214 authorizations is the result of streamlining changes in Commission rules after those individual authorizations were granted (e.g., to allow global international Section 214 authority), or the result of previously-notified retirements of associated facilities.¹ In no instance does the surrender of the following international Section 214 authorizations impact the ability to provide existing services or facilities to customers.

As the result of this review, AT&T provides notification of the surrender of the following international Section 214 authorizations by the AT&T affiliates listed as grantees for each authorization.

Grantee	Authorization Number(s) and FCC Order	Description
