Those applicants reselling international private lines for the provision of non-interconnected private line service are limited to the provision of such private line service only between the U.S. and those points listed in their application -- that is, private lines which originate in the U.S. and terminate in one of the points listed in their application, or which originate in one of the points listed in their application and terminate in the U.S. In addition, applicants may not -- and the applicants' tariffs must state that the applicants' customers may not -- connect private lines provided over these facilities to the public switched network at either the U.S. or foreign end, or both, for the provision of international basic telecommunications services, including switched voice services, unless authorized to do so by the Commission upon a finding that the foreign administration affords resale opportunities equivalent to those available under U.S. law, in accordance with Regulation of International Accounting Rates, Phase II, First Report and Order, 7 FCC Rcd 559 (1991), Order on Reconsideration and Third Further Notice of Proposed Rulemaking, 7 FCC Rcd 7927 (1992), petition for reconsideration bending.

In addition, grant of all of these private line resale applications may be subject to future modification pursuant to the outcome of the Phase II Third Further Notice, FONOROLA/EMI Order, 7 FCC Rcd 7312 (1992), and any related proceedings.

Further, applicants nor any persons or companies directly or indirectly controlling them or controlled by them, or under direct or indirect common control with them, shall acquire or enjoy any right, for the purposes of handling or interchanging traffic to or from the United States, its territories or possessions which is denied to any other United States carrier

The applicants shall file the annual reports of overseas telecommunications traffic required by Section 43.61 of the Commission's Rules, 47 C.F.R. Section 43.61.
