APPLICATION FOR AUTHORITY

NETWORK ENHANCED TELECOM, LLP ("NET") respectfully requests authority, pursuant to Section 214 of the Communications Act of 1934, as amended, 47 U.S.C. Section 214 (1992), and Section 63.18 of the Commission's Rules, 47 C.F.R. Section 63.18 (1996), to resell the international message communications services of other common carriers between the United States and various international points.

NET is a Limited Liability Partnership organized under the laws of the State of Texas. The company intends to resell the telecommunications services of other common carriers and is not a facilities based carrier. NET's services will be offered nationwide. Through its service, customers may originate calls nationwide or in other countries for termination in the United States or to other countries. The company seeks authority to resell international telecommunication services to better serve its customers by offering a full range of telecommunication products and services. By providing international calling services, NET will be able to offer customers a valuable service at competitive rates.

NET will obtain international telecommunications services from other currently authorized common carriers. NET will resell the services of carriers that have obtained authorization from the Commission.

NET's provision of international service will not significantly impact the general provision of such service to the public. However, the added competition from NET benefits the consumers of international telecommunications services. These benefits include lower prices and a greater availability of service options. Therefore, the grant of this authority would serve the public interest.
