APPLICATION FOR AUTHORITY

Fidelity Networks, Inc. ("Fidelity") hereby requests authority, pursuant to Section 214 of the Communications Act of 1934, as amended, 47 U.S.C. Section 214, and the Commission's Rules governing authorization of international carriers, 47 C.F.R. Section 63.09 et seq., to resell the international telecommunications services of other common carriers between the United States and various international points.

Fidelity Networks, Inc. is a corporation organized under the laws of the state of Missouri. The company intends to resell the telecommunications services of other common carriers and is not a facilities-based carrier. Fidelity Networks, Inc.'s service will be offered for use by residential consumers, business customers with foreign offices, foreign firms with US operations, or other individuals and entities who subscribe to the company's interstate and/or intrastate services. Through Fidelity's service, customers may originate calls from locations within the United States to other countries, and from foreign locations to terminate in the United States. The company seeks authority to resell international telecommunications services to better serve its customers by offering a full range of call termination options. By providing international calling services Fidelity Networks, Inc. will be able to offer its customers valuable service at competitive rates.

International telecommunications services will be obtained by Fidelity Networks, Inc. from other common carriers who are currently authorized by the Commission to provide international service. Initially, Fidelity Networks, Inc will only resell international switched services. However, Fidelity Networks, Inc. requests authority to resell private line service in the future as contemplated under Section 63.18 (e) (2) and subject to the restrictions imposed therein.

The provision of international service by Fidelity Networks, Inc. will not have any significant impact on the general provision of such service to the public. However, additional competition in the market - including the competition of Fidelity Networks, Inc. - benefits consumers of international telecommunications services. The benefits of competition include lower prices and increased availability of a variety of service options. Thus, the grant of this authorization is consistent with the public interest.

In support of Fidelity Networks, Inc.'s request for authorization, the following information is submitted pursuant to Section 63.18 of the Commission Rules, 47 C.F.R. Section 63.18.

(a) The name, address and telephone number of the applicant:
