Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, DC 20554

In the Matter of
BAILI-NET TECHNOLOGY, INC.
Application for authority pursuant to
Section 214 of the Communications Act of
1934, as amended, for global authority to
operate as an international facilities-based
and resale carrier

Baili-Net Technology, Inc. ("Baili-Net") hereby requests authority pursuant to Section 214 of the Communications Act of 1934, as amended, 47 U.S.C. § 214 (1986), and Section 63.18 of the Commission's Rules, 47 C.F.R. § 63.18 (1997), to provide international facilities-based and resale services between the United States and various international points. The authority requested is for global in nature. Further, Baili-Net requests that this authority be granted through the Commission's streamlined procedures as outlined in Section 63.12 of the Commission's Rules, 47 C.F.R. §63.12.

Baili-Net was incorporated in California on May 4, 1999. Baili-Net has no affiliations with foreign carriers. Baili-Net plans to provide telecommunications service in several states, although its largest customer base will be California.

By granting this application, the Commission will serve the public interest, convenience and necessity by promoting competition in the international services market. Competition will benefit U.S. consumers of international telecommunications service by increasing the number of service options available and putting downward pressure on prices. Thus, the public interest will be served by granting the requested Section 214 authority to Baili-Net.
