APPLICATION

Clean Earth Energy, Inc., a California corporation (“Clean Earth”) hereby requests from the Federal Communications Commission (the “Commission”) the authority, pursuant to Section 214 of the Communications Act of 1934, as amended, 47 U.S.C. § 214 (1982) (the “Act”), and Section 63.18 of the Commission’s rules (“Rules”) under 47 C.F.R. § 63.18, to provide global international resale services between the United States and international points.

**I. Preamble**

Clean Earth is a corporation organized for the purpose of providing telecommunications services, both within and outside of the United States. Clean Earth desires to serve the public through reselling international services of authorized U.S. common carriers. Clean Earth is filing its application with the Public Utilities Commission of the State of California (“CPUC”) to provide interexchange and intraexchange telecommunications services. Except as may be authorized with respect to the foregoing pending application, Clean Earth is not presently providing any telecommunications services.

Granting this application to provide global international resale services between the United States and international points (“Application”) will serve the public interest, convenience and necessity through the introduction of an additional competitor to the international communications market, thus promoting competition in the international services market. Such increased competition will benefit U.S. consumers by expanding service alternatives and reducing prices. Consequently, granting Clean Earth the authority requested in this Application will serve the public interest.
