

**Attachment**  
**Reason for Surrender**

Interstate Cablevision Company, the holder of the subject International Section 214 Authorization for Global Resale (File No. ITC-214-20160112-00008), and its parent company Husker One, L.L.C. have been sold to FMTC-SWT, Inc., which, in turn, is a wholly-owned subsidiary of Farmers Mutual Telephone Company. The Wireline Competition Bureau has granted its consent to the Domestic Section 214 Application seeking the subject transfer of control in WC Docket No. 18-116.

Farmers Mutual Telephone Company and its existing affiliates already operate under an existing International Section 214 Authorization for Global Resale (File No. ITC-214-20080728-00349).

Rather than transferring control of the subject International Section 214 Authorization of Interstate Cablevision Company, it has been determined to cancel it and to provide global resale service to Interstate Cablevision Company's customers via the existing Farmers Mutual Telephone Company global resale authorization.

Neither Farmers Mutual Telephone Company and its existing affiliates, nor Interstate Cablevision Company -- either before or after cancellation -- originate a material amount of resold international toll traffic. In fact, their total share of international toll traffic is far less than one percent (1.00%) of the international toll services minutes or revenues.
