Nor is either of the applicants affiliated with a dominant U.S. carrier whose international switched or private line services it seeks to resell. Consequently, this application is eligible for streamlined processing.³

I. Description of the Applicants

A. GST Telecommunications, Inc.

GST Telecommunications, Inc. is a corporation organized under the laws of Canada with its principal business office located at 4001 Main Street, Vancouver, Washington 98663. GST is a publicly held, non-carrier holding company.

GST Telecommunications, Inc. through its operating subsidiaries (together "GST") is a facilities-based integrated communications service provider, currently offering voice, data and Internet service throughout the Western United States. The Company offers an array of products, including data transport, high-speed Internet access, and voice services, including local exchange and interexchange services. The Company holds authority to provide intrastate interexchange service in 49 states and intrastate local exchange service in 11 states pursuant to certification, registration, or tariff requirements, or it provides service on an unregulated basis. Several of GST's subsidiaries hold Section 214 authority to provide interstate and international telecommunications services as nondominant common carriers.⁴

B. Time Warner Telecom

Time Warner Telecom is a Delaware corporation with its principal business office located at 10475 Park Meadows Drive, Littleton, Colorado 80124. Time Warner Telecom is a publicly-traded company whose largest shareholder is Time Warner Inc. Time Warner Telecom currently provides local exchange and exchange access services as well as interexchange service. It is authorized to provide intrastate telecommunications services in thirteen states and has requests for authority pending in ten other states. As a holder of Section 214 authority, Time Warner Telecom's qualifications are a matter of record with the Commission.

⁴ See text accompanying note 1.

II. Description of the Transaction

Time Warner Telecom proposes to acquire most of the assets of GST Telecommunications, Inc. and its subsidiaries in connection with a reorganization of the Company being overseen by the U.S. Bankruptcy Court for the District of Delaware. Among other things, Time Warner Telecom will acquire assets associated with GST's telecommunications operations, including telecommunications equipment, portions of GST's customer base, and the Federal and State certifications authorizing those operations. GST and Time Warner Telecom have executed the Asset Purchase Agreement under which Time Warner Telecom will purchase substantially all of the Company's assets, including assets used for the provision of international telecommunications services. That asset purchase agreement has been approved by the Bankruptcy Court.

Time Warner Telecom has determined that the proposed acquisition of GST's assets in the bankruptcy proceeding will enable it to significantly expand its operations in a cost-efficient manner, thereby enhancing its competitive position and ability to provide an array of high quality services to consumers. Although the proposed acquisition will result in a transfer of substantially all of GST's assets to Time Warner Telecom, the Agreement will not involve a change in the manner in which GST's customers will receive their telecommunications services, and will be virtually transparent to the customers. Specifically, customers will continue to receive the high quality, affordable telecommunications services that they presently receive. To ensure a seamless transition and avoid customer confusion or inconvenience, the Parties are notifying customers of this transaction and of the change in carrier.

III. Public Interest Considerations

The Applicants respectfully submit that consumers of GST's telecommunications services will realize significant public interest benefits from Time Warner Telecom's acquisition of the certificates and assets of GST. The proposed transaction will enable GST's customers to continue to receive high-quality, competitively priced telecommunications services without interruption. By creating a more efficient and multifaceted telecommunications carrier, the proposed transaction will expand competitive choices for U.S. telecommunications consumers. The Applicants hope to complete the proposed acquisition as quickly as possible in order to avoid any interruption of service or other inconvenience to GST's existing customers.
