**APPLICATION TO ASSIGN AND TRANSFER CONTROL OF PENDING
APPLICATION FOR
INTERNATIONAL SECTION 214 AUTHORITY**

Pursuant to Section 214 of the Communications Act of 1934, as amended, (“the Act”), 47 U.S.C. § 214, and Section 63.24 of the Commission’s rules, 47 C.F.R. § 63.24, Long Lines Wireless LLC (“Long Lines”) (FRN 0014644819), and LL Acquisition Company, LLC (“LL Acquisition” or “Assignee”) (FRN 0022843510), hereby request Commission consent to the assignment to LL Acquisition of both the pending application of Long Lines for an international Section 214 authorization and, ultimately, the 214 authorization that results from that application.

As described in Attachment 1, this application is one of a series of applications seeking the Commission’s approval for the assignment of licenses and authorizations held by wholly-owned subsidiaries of Long Lines, to LL Acquisition under the control of AT&T Inc. (“AT&T”).¹ In preparing for the FCC filing for consent to the transaction, Long Lines

determined that it did not have the requisite international Section 214 authorization to provide international services to its customers. Upon this discovery, Long Lines Wireless promptly filed an application with the International Bureau on July 2, 2013 (ITC-214-20130709-00182). This application was not initially processed until July 15, 2013. Because the authorization has not yet been granted, the Applicants are not able to file electronically via IBFS. Accordingly, Applicants are making this filing on paper to seek Commission consent to transfer control of both the pending application and the 214 authorization sought by that application. Attached hereto is a waiver request for filing a paper application.

International Section 214 Authorizations:

AT&T, which will become the ultimate parent company of LL Acquisition, has 49 subsidiaries that collectively hold global or limited global facilities-based or resale Section 214 authorizations, including those for Cuba. These subsidiaries hold global authority under Section 214 to provide a range of facilities-based services, *see, e.g.*, ITC-214-19960830-00414 (Previous File Number ITC-96-487) (AT&T Corp. authority to provide global facilities-based services), including those originating in region and out of region, *see, e.g.*, ITC-214-20001130-00713 (SBC Long Distance, LLC authority to provide facilities-based and resale services originating in Kansas and Oklahoma); ITC-214-19971108-00689 (SBC Long Distance, LLC authority to provide facilities-based services originating out of region). AT&T subsidiaries also have global authority under Section 214 to provide various resale services. *See, e.g.*, ITC-214-19960223-00083 (SNET America, Inc. authority to resell private line services); ITC-214-19970814-00493 (Previous File Number ITC-97-506) (TC Systems, Inc. global authority to resell international switched services). Other AT&T subsidiaries hold authority to provide services on particular routes or over particular facilities. *See, e.g.*, ITC-89-060 (AT&T of Puerto Rico, Inc. and AT&T of the Virgin Islands, Inc. authority to operate additional capacity in St. Thomas-Tortola and Eastern Caribbean DCMS for use in providing services to various Caribbean points). AT&T's

subsidiaries do not provide services to any of the countries in which they have an affiliate solely through the resale of the international switched services of an unaffiliated United States facilities-based carrier.

A complete list of the AT&T subsidiaries holding Section 214 authorizations, the file numbers associated with such authorizations and a description of such authorizations is set forth below in Attachment A.

Answer to Question 11 - Section 63.18(h):²

Answer to Question 15 - Section 63.18(j):

Pursuant to Section 63.18(j) of the Commission's rules, 47 C.F.R. § 63.18(j), AT&T certifies that it is not a foreign carrier, but that it holds controlling interests in certain foreign carriers in destination countries where its subsidiaries provide international service. These carriers and the countries where they provide service are described above in the answer to Question 14.

Answer to Question 16 - Section 63.10:

Pursuant to Section 63.10 of the Commission's rules, 47 C.F.R. § 63.10, AT&T qualifies for non-dominant classification on the routes between the United States and all the above-listed countries because the affiliates in these countries have no market power on the foreign end of any of these routes.⁵ All of the above-listed affiliates have market shares under 50 percent in any relevant market on the foreign end of U.S. routes to these countries. Therefore, because all these companies lack 50 percent market share in the international transport and the local access markets in their respective foreign markets, and none is listed on the Commission's List of Foreign Telecommunications Carriers that Are Presumed to Possess Market Power in Foreign Telecommunications Markets, AT&T is presumptively classified as non-dominant on these routes.

Answer to Question 18 - Section 63.18(k):

In accordance with Section 63.18(k)(1) of the Commission's rules, 47 C.F.R. § 63.18(k)(1), AT&T certifies that all of the countries listed in its response to Question 15 (therein referencing its response to Question 14) are WTO Member countries.

Answer to Questions 29-31:

An officer of AT&T Mobility Corporation ("AMC") is signing this application on behalf of LL Acquisition. Neither AMC nor any of its affiliates currently owns or controls LL Acquisition. After the consummation of the proposed transaction, however, LL Acquisition will be a wholly owned, indirect subsidiary of AT&T, and AMC will manage LL Acquisition. In

signing this application, the AMC officer's certifications about LL Acquisition pertain to that entity as it will exist and operate *post consummation* of this transaction.

Waiver Request

Applicants request a waiver of Section 47 C.F.R. § 1.10006 of the Commission's rules, which requires that this application be filed electronically. Preparing for the FCC filings for consent to the transaction, Long Lines Wireless LLC ("Long Lines Wireless") determined it did not have the requisite international Section 214 authorization to provide international services to its customers. Upon this discovery, Long Lines Wireless promptly filed an application with the International Bureau on July 2, 2013 (ITC-214-20130709-00182). Because the authorization has not yet been granted, the Applicants are not able to file electronically via IBFS. Accordingly, a waiver is required so Applicants can file this application in a timely manner, along with the other transfer applications, pursuant the terms of the Applicants' agreement.

**DESCRIPTION OF THE TRANSACTION
AND PUBLIC INTEREST STATEMENT**

These Applications seek the Commission's approval for the assignment of licenses and authorizations held by LL License Holdings, LLC, LL License Holdings II, LLC and Long Lines Wireless LLC, all wholly-owned subsidiaries of Long Lines Communications, LLC (collectively, "Long Lines"), to an indirect, wholly-owned subsidiary of AT&T Inc. (collectively with its subsidiaries and affiliates, "AT&T" and together with Long Lines, the "Applicants"). Specifically, Long Lines has agreed to assign, upon obtaining Commission consent and all other regulatory approvals, fifteen PCS licenses, seven AWS-1 licenses, and an international Section 214 authorization covering portions of Iowa, South Dakota, North Dakota, Minnesota and Nebraska (collectively, the "Long Lines Licenses"), as well as customers, network equipment and other assets in and around northwestern Iowa (collectively, with the Long Lines Licenses, the "Long Lines Assets").

The proposed transaction will benefit consumers in many ways. In the parts of the Long Lines service area where AT&T currently does not provide service, AT&T will upgrade the Long Lines network – which is currently only 2G – to 4G HSPA+ and 4G LTE, and expand its network footprint, thereby eliminating the need for roaming in these areas. As a result, AT&T's customers will experience faster, higher quality services throughout northwestern Iowa. Long Lines customers, who currently receive 2G service, will gain access to a range of products and services available on AT&T's 4G nationwide network. Long Lines has no plans to deliver these products and services on its own. In the areas where the Long Lines and AT&T networks overlap, the transaction will allow AT&T to expand the capacity and deepen the coverage of its

3G UMTS and 4G LTE networks and provide a significantly improved experience for customers of both companies.

These benefits will be achieved without any harm to competition. AT&T's spectrum holdings will remain below (and frequently, far below) the Commission's spectrum screen in every geographic area at issue, and there will continue to be numerous actual and potential competitors holding spectrum in each of the Long Lines license areas. Indeed, by allowing AT&T to offer more robust services, this transaction will spur competitors to step up their own offerings.

Accordingly, the proposed transaction will serve the public interest, and the Commission should approve the Applications expeditiously and unconditionally.

I. DESCRIPTION OF THE APPLICANTS AND THE TRANSACTION

AT&T is a leading provider in the United States of wireless, Wi-Fi, high-speed Internet, local and long distance voice, mobile broadband, and advanced TV services, as well as worldwide wireless coverage and IP-based business communications services.¹ The Commission has concluded repeatedly that AT&T has the qualifications required by the Communications Act of 1934, as amended (the "Act") to hold Commission authorizations,² and nothing has changed to disturb this conclusion.

Long Lines is a privately-held telecommunications provider, offering wireline and wireless phone, cable television, and high-speed Internet services to customers in parts of northwest Iowa, Minnesota, Nebraska, and South Dakota.³ Long Lines provides retail wireless voice and data services under the “Long Lines Wireless” brand name to approximately 18,000 subscribers. There is no question about Long Lines’ character or qualifications to hold Commission authorizations.⁴

The licenses and authorizations that are the subject of these Applications, together with the related network assets, will be assigned to a newly formed subsidiary of Long Lines, control of which will be transferred to AT&T at closing.

II. THE STANDARD OF REVIEW

In deciding whether to grant these Applications under Sections 214(a) and 310(d) of the Communications Act of 1934, as amended,⁵ the Commission first must assess whether the proposed transaction complies with the specific provisions of the Communications Act, other applicable statutes, the Commission’s rules, and federal communications policy. Commission then weighs any potential public interest harms of the proposed transaction against the potential public interest benefits. The Applicants bear the burden of proving, by a preponderance of the evidence, that the proposed transaction, on balance, serves the public interest.⁶ The Commission “may not consider whether the public interest, convenience, and necessity might be served by” a transaction involving an entity “other than the proposed transferee.”⁷ Moreover, the Commission repeatedly has found that an assignment or transfer proceeding is not the proper forum for addressing general industry issues that are not specific to the transaction.⁸

In general, the Section 310(d) standard requires the Commission to balance the potential public interest benefits of the proposed transfer against any likely harms. Thus, if it is clear on the face of an application that a license assignment/transfer will not violate the Act or Commission rules or frustrate or undermine policies and enforcement of the Act and will not reduce competition,⁹ the application does not require extensive review.¹⁰ In particular, where, as here, the acquiring party possesses the requisite qualifications to control the licenses in question,

and there are no transaction-specific harms, the Commission does not require a detailed showing of transaction-specific benefits.¹¹

This transaction does not violate any law or rule, requires no waivers of the Commission's rules, and does not result in unjust enrichment. Nor does it impede the realization of the objectives of the Act or the Commission's ability to implement the Act. To the contrary, as described below, this transaction will result in public interest benefits without harming competition, and, accordingly, the Commission should approve it expeditiously and unconditionally.

III. THE TRANSACTION WILL SERVE THE PUBLIC INTEREST AND BENEFIT WIRELESS CONSUMERS

The assignment of these licenses to AT&T unambiguously serves the public interest. First, in areas where the AT&T and Long Lines networks do not overlap, the transaction will allow AT&T to expand its network coverage, giving customers access to a faster, facilities-based network than Long Lines currently provides in those areas. Second, in areas where the AT&T and Long Lines networks overlap, the transaction will enable AT&T to densify its network, which will lead to a faster, more reliable network, with greater capacity. Third, Long Lines'

customers will gain access to a range of services offered on AT&T's nationwide network.

Fourth, the transaction will result in roaming cost savings.

A. The Transaction Offers Many Benefits to Customers

The Commission consistently has recognized the public interest benefits of improving the capacity and network quality of a wireless carrier's network.¹² The transaction will permit AT&T to expand quickly its network capacity and coverage in the license areas – primarily in rural areas. In some of these areas, AT&T's current spectrum holdings are relatively thin, and in others AT&T has no network coverage at all. The acquired spectrum will allow AT&T to expand the coverage and capacity of its network to help keep up with consumer demands for data-intensive services and to deploy much more robust advanced services.¹³

In the areas where AT&T and Long Lines' networks do not overlap, the proposed transaction will bring advanced broadband services, including 4G HSPA+ and LTE to more customers in these areas, and at a much faster pace, than Long Lines – which has no plans to upgrade its 2G network – would be able to achieve. AT&T has no network at all in a large part of Long Lines' service area – primarily in northwestern Iowa, east of the Sioux Falls area. Thus, today, when AT&T customers travel to those areas, they roam on Long Lines' 2G network, which provides the AT&T customers with a lower quality of service than they enjoy on

AT&T's 3G and 4G networks. As a result of the transaction, the Long Lines network will be upgraded to 4G HSPA+ and LTE, providing high-quality service for AT&T customers in the license areas. Because AT&T will integrate the networks, customers always will experience on-net service in the these areas.

Further, Long Lines customers will benefit from transitioning to AT&T's advanced 4G network. Long Lines' approximately 18,000 customers currently receive only 2G service, and Long Lines has no plans to deploy more-advanced services. AT&T's nationwide and global network provides AT&T's wireless customers a level and variety of services that Long Lines cannot offer.¹⁴

In areas where the AT&T and Long Lines networks overlap, AT&T will integrate complementary Long Lines cell sites and select other equipment, resulting in a denser network with improved coverage and capacity gains. Customers of both companies will enjoy a better experience – particularly in areas where they may be experiencing dropped calls, dead spots and coverage gaps. Greater cell site density also will enable faster data speeds and permit better signal penetration of homes and other buildings. Such integration also will help AT&T to keep up with growing demands for broadband service.

Following the transaction, Long Lines customers will gain access to the range of services available on AT&T's nationwide 4G network. Through AT&T's international roaming partners, Long Lines' subscribers will be able to make and receive calls in more than 225 countries and

access data services in more than 210 countries, as well as use nearly 402,000 Wi-Fi hotspots globally through roaming agreements.¹⁵ Among other things, Long Lines' customers also will enjoy:

- expanded choice of handsets with advanced service capabilities;
- wider variety of rate plans;
- more robust set of data services;
- free mobile-to-mobile calling to a substantially expanded customer base;
- rollover of unused minutes to the next month;
- free access to 32,000 Wi-Fi hotspots for eligible subscribers;¹⁶ and
- access to AT&T's nationwide footprint when traveling.

Because AT&T expects to integrate the Long Lines customers into its network rapidly and efficiently, Long Lines customers will experience these numerous benefits relatively quickly. AT&T has experience in transitioning customers to its network following previous transactions, a number of which have been far larger than this one. In other transactions, the

Commission has recognized the importance of such experience in ensuring the promised benefits will be realized and should do so here.¹⁷

B. The Transaction Yields Cost Savings

In addition to the compelling direct benefits to consumers described above, the proposed transaction also will result in roaming cost savings. By expanding AT&T's coverage, the transaction will result in more on-net usage by both AT&T's current customers and the acquired Long Lines customers, thereby reducing reliance on roaming. Roaming costs, therefore, will decline sharply with the resultant internalization of such roaming costs and elimination of double marginalization.¹⁸ The Commission has credited similar synergies in past transactions and should do so here.¹⁹

In short, the transaction will enable AT&T to bring significant, tangible benefits to customers. The Commission has long recognized that increasing the diversity and range of

¹⁷ See *Verizon/RCC Order*, 23 FCC Rcd. at 12,519 ¶ 132 (declining to require Verizon Wireless to provide greater detail regarding its plans for converting RCC customers from the existing GSM network to CDMA than that already provided by Verizon Wireless based, in part, on the Commission's recognition "that Verizon Wireless, in light of its many acquisitions, has had significant experience in transitioning customers from one system to another, some involving the replacement of one technology with another.").

¹⁸ As the Commission has recognized repeatedly, the internalization of roaming costs, as well as the elimination of the transaction costs of administering roaming, serve the public interest because they lower the marginal cost of providing service and are therefore "likely to benefit consumers through lower price and/or increased service." *Cingular/AT&T Wireless Order*, 19 FCC Rcd. at 21,605 ¶ 219; accord *Western Wireless Order*, 20 FCC Rcd. at 13,108 ¶ 151 ("ALLTEL's merger with WWC would reduce its roaming costs in geographic markets where ALLTEL and WWC's service areas do not overlap, and the elimination of roaming agreements in these markets would directly benefit . . . its customers . . .").

¹⁹ See, e.g., *AT&T/Dobson Order*, 22 FCC Rcd. at 20,334-35 ¶ 83 (crediting cost synergies in roaming, among others).

features and services available to customers is in the public interest.²⁰ This transaction will deliver these benefits as well as reduce roaming costs.

IV. THE TRANSACTION WILL NOT HARM COMPETITION

This transaction will enable AT&T to enhance its provision of 4G mobile broadband services and make AT&T a more effective competitor, further promoting competition in the wireless marketplace. Moreover, the transaction will not result in any competitive harms nationally or in the license areas that are the subject of this transaction.²¹

²⁰ See, e.g., *T-Mobile/MetroPCS Order*, 28 FCC Rcd. at 2,348 ¶ 74; *AT&T/Verizon Order*, 25 FCC Rcd. at 8,738-41 ¶¶ 79-86; *Applications of AT&T Inc. & Dobson Commc'ns Corp. for Consent to Transfer Control of Licenses & Authorizations*, Memorandum Opinion and Order, 22 FCC Rcd. 20,295, 20,330-34 ¶¶ 73-82 (2007); *Midwest Wireless Holdings, L.L.C. & Alltel Commc'ns, Inc. for Consent to Transfer Control of Licenses & Authorizations*, Memorandum Opinion and Order, 21 FCC Rcd. 11,526, 11,564-67 ¶¶ 105-09, 111-12 (2006); *Applications of Western Wireless Corp. & Alltel Corp. for Consent to Transfer Control of Licenses & Authorizations*, Memorandum Opinion and Order, 20 FCC Rcd. 13,053, 13,101-04 ¶¶ 135-36, 138-40 (2005); *Applications of Nextel Commc'ns, Inc. & Sprint Corp. for Consent to Transfer Control of Licenses & Authorizations*, Memorandum Opinion and Order, 20 FCC Rcd. 13,967, 14,013-14 ¶¶ 129-130 (2005) ("*Sprint/Nextel Order*"); *Applications of AT&T Wireless Servs., Inc. & Cingular Wireless Corp. for Consent to Transfer Control of Licenses & Authorizations*, Memorandum Opinion and Order, 19 FCC Rcd. 21,522, 21,604-05 ¶¶ 216-20 (2004).

²¹ Recently, in addition to its traditional review of competition at the local level, the Commission has analyzed the impact of a transaction on national competition under certain circumstances. See *T-Mobile/MetroPCS Order*, 28 FCC Rcd. at 2,333 ¶ 33; *Applications of AT&T Mobility Spectrum LLC, New Cingular Wireless PCS, LLC, Comcast Corp., Horizon Wi-Com, LLC, NextWave Wireless, Inc., & San Diego Gas & Elec. Co. for Consent to Assign & Transfer Licenses*, WT Dkt No. 12-240, Memorandum Opinion and Order, FCC 12-156, ¶¶ 25-28, 37 (rel. Dec. 18, 2012) ("*AT&T/WCS Order*"); *Applications of Cellco P'ship d/b/a Verizon Wireless & SpectrumCo LLC & Cox TMI, LLC for Consent to Assign AWS-1 Licenses*, Memorandum Opinion and Order and Declaratory Ruling, 27 FCC Rcd. 10,698, 10,718-19, 10,724-27 ¶¶ 54-58, 70-78 (2012). AT&T's acquisition of a small amount of spectrum covering portions of five states and approximately 18,000 subscribers – which will account for less than .02 percent of AT&T's total wireless subscribers – will not have a negative impact on national competition.

AT&T's acquisition of the Long Lines Licenses would not cause AT&T to hit the Commission's spectrum screen anywhere.²² Indeed, as shown in Appendix A, in the majority of counties, AT&T's post-transaction holdings would not even come close to the screen. Therefore, the modest increase in AT&T's spectrum holdings through this transaction raises no competitive concerns.²³

Competition will remain vigorous in each license area after the transaction. Long Lines has a very small market presence with approximately 18,000 total subscribers in a service area covering 800,000 people. Moreover, as shown in Appendix B, there will continue to be numerous actual and potential competitors holding spectrum in each of the Long Lines license areas, including Verizon, Sprint, T-Mobile, US Cellular and iWireless.²⁴ Given these alternatives, and Long Lines' very limited presence, the acquisition poses no competitive concerns.

²² The Commission's current screen is triggered where applicants would have "102 megahertz or more of cellular, PCS, SMR, 700 MHz, and WCS spectrum, where neither BRS nor AWS-1 spectrum is available; 121 megahertz or more of spectrum, where BRS spectrum is available, but AWS-1 spectrum is not available; 132 megahertz or more of spectrum, where AWS-1 spectrum is available, but BRS spectrum is not available; or 151 megahertz or more of spectrum where both AWS-1 and BRS spectrum are available." *AT&T/WCS Order*, ¶ 33 n.94.

²³ See, e.g., *Sprint Nextel Corp. and Clearwire Corp., Applications for Consent to Transfer Control of Licenses, Leases, and Authorizations*, Memorandum Opinion and Order, 23 FCC Rcd. 17,570, 17,601 ¶ 76 (2008) ("The purpose of this initial screen is to eliminate from further review those markets in which there is clearly no competitive harm relative to today's generally competitive marketplace."); *AT&T/Dobson Order*, 22 FCC Rcd. at 20,317 ¶ 39; *Cingular/AT&T Wireless Order*, 19 FCC Rcd. at 21,568-69 ¶¶ 106-109.

²⁴ See Appendix B. Verizon holds cellular, PCS, AWS, and 700 MHz spectrum throughout the Long Lines license area, Sprint holds PCS and SMR spectrum in each CMA in the Long Lines license area and BRS spectrum in many CMAs, T-Mobile holds PCS and AWS spectrum in each CMA, and US Cellular holds cellular spectrum in 6 CMAs, PCS spectrum in 9 CMAs, and 700 MHz spectrum in 9 CMAs. See also *Sprint/Nextel Order*, 20 FCC Rcd. at 13,969 ¶ 3 (noting "there will be a continuing presence of multiple other substantial carriers in each overlap market with the capacity to add subscribers and the ability to add capacity.").

The transaction also will not have an adverse effect on roaming. Carriers that currently rely on Long Lines for GSM roaming will continue to have access to GSM roaming service after the transaction. Indeed, by deploying 4G HSPA+ and LTE, AT&T will improve the roaming services available to other GSM carriers.

V. MISCELLANEOUS REGULATORY MATTERS

A. After-Acquired Authorizations

The Applicants request that any Commission approval of these Applications include authority for AT&T to be assigned any applications regarding the Long Lines Assets that are pending at the time of consummation. Such action would be consistent with prior decisions of the Commission. Accordingly, the Applicants also request that Commission approval include any of Long Lines' licenses that may have been inadvertently omitted from the application forms the Applicants are filing.

B. Blanket Exemption to Cut-Off Rules

The public notice announcing this transaction will provide adequate notice to the public with respect to the licenses involved, including any for which license modifications are now pending. Therefore, no waiver needs to be sought from Sections 1.927(h), 1.929(a)(2) and 1.933(b) of the Commission's rules²⁵ to provide a blanket exemption from any applicable cut-off rules in cases where the Applicants file amendments to pending license applications to reflect the consummation of the proposed assignments.

C. Environmental Impact

²⁵ 47 C.F.R. §§ 1.927(h), 1.929(a)(2), 1.933(b).

**International Section 214 Assignment Application
Attachment 1**

As required by Section 1.923(e) of the Commission's rules,²⁶ the Applicants state that the assignment of licenses involved in this transaction will not have a significant environmental effect, as defined by Section 1.1307 of the Commission's rules.²⁷ An assignment of licenses does not involve any engineering changes and, therefore, cannot have a significant environmental impact.

VI. CONCLUSION

For the foregoing reasons, the Commission should conclude that the proposed transaction serves the public interest, convenience and necessity and should expeditiously, and unconditionally, grant these Applications.
