- Rockwell Collins, Inc. is a U.S. corporation organized under the laws of the State of Delaware.

- Rockwell Collins, Inc. has not previously received Section 214 authority.

ANSWER TO QUESTION 11

Rockwell Collins, Inc. is a publicly traded company. One entity holds 10 percent or more of Rockwell Collins, Inc.'s voting stock:

- Capital World Investors
Address: 333 South Hope Street, Los Angeles, CA 90071
Citizenship: Delaware
Principal business: investment management services
Relationship: Owns 11.8 percent of Rockwell Collins, Inc.

No other individual or entity holds a direct or indirect ten percent or greater equity or voting interest in Rockwell Collins, Inc.

ANSWER TO QUESTION 12

Rockwell Collins, Inc. has no interlocking directorates.

ANSWER TO QUESTION 13

Description of the Parties

ARINC is a global provider of transportation communications and systems engineering. ARINC develops and operates communications and information processing systems and provides systems engineering to five key industries: airports, aviation, defense, government, and surface transportation. ARINC is a Delaware corporation, headquartered in Annapolis, Maryland, with 2,000 employees worldwide. ARINC and its subsidiary, Aeronautical Radio, Inc. ("Aeronautical Radio"), hold a variety of FCC licenses and authorizations. ARINC is a subsidiary of Radio Holdings, Inc. ("Radio Holdings") which is also a Delaware corporation. Radio Holdings is a subsidiary of Carlyle Partners IV.

Rockwell Collins Inc. ("Rockwell Collins") is a publicly-traded Delaware Corporation with its headquarters in Cedar Rapids, Iowa. Rockwell Collins provides design, production and support of communications and aviation electronics for commercial and military customers worldwide. Rockwell Collins' products and systems are primarily focused on aviation applications. Rockwell Collins' Government Systems business also offers products and systems for ground and shipboard applications. Rockwell Collins provides a wide range of service centers worldwide, including equipment repair and overhaul, service parts, field engineering, training, technical information services and aftermarket used equipment sales. Rockwell Collins serves a broad range of customers worldwide, including the U.S. Department of Defense, U.S. Coast

Guard, civil agencies, defense contractors, foreign ministries of defense, manufacturers of commercial air transport, business and regional aircraft, commercial airlines and other aircraft.

Rockwell Collins is a pioneer in the development and deployment of innovative communication and aviation electronic solutions for both commercial and government applications. Its expertise in flight deck avionics, cabin electronics, mission communications, information management, and simulation and training is delivered by 19,000 employees, and a global service and support network that crosses 27 countries.

Description of the Transaction

On August 10, 2013, Rockwell Collins, Avatar Merger Sub, Inc. (“Avatar”), Radio Holdings, and TC Group IV Managing GP, L.L.C. (“TC Group”) entered into an Agreement and Plan of Merger (“Agreement”). Avatar is a wholly-owned subsidiary of Rockwell Collins. Pursuant to the Agreement, Avatar shall be merged with and into Radio Holdings, with Radio Holdings as the surviving corporation and a subsidiary of Rockwell Collins. The transaction thus will result in a change of control of all of the Commission licenses and authorizations held by ARINC and Aeronautical Radio from Carlyle Partners IV to Rockwell Collins.

In addition to the international Section 214 authorization that is the subject of the instant application, ARINC and Aeronautical Radio hold a number of licenses, authorizations, and registrations, control of which will be transferred to Rockwell Collins upon consummation of the transaction. Specifically, these include:

- Private-Operational Fixed Point-to-Point Microwave Service licenses issued under Part 101 of the FCC’s rules;
- Private Land Mobile Radio Services licenses issued under Part 90 of the FCC’s rules;
- A nationwide non-exclusive 3650-3700 MHz license issued under Part 90 of the FCC’s rules;
- An Experimental Radio authorization issued under Part 5 of the FCC’s rules; and
- Antenna Structure Registrations issued under Part 17 of the FCC’s rules.

The parties have prepared and submitted a set of applications and filings as required by the FCC’s rules to seek FCC consent to the proposed transfer of control.¹

Public Interest Statement

As discussed below, the proposed transfer of control of ARINC to Rockwell Collins will create substantial public interest benefits with no offsetting public interest harms. Therefore, the Commission should expeditiously approve the proposed transfer of control.

¹ Notifications of the change in ownership of the Antenna Structure Registrations will be submitted upon closing, as required by FCC rules.

Pursuant to Section 310(d) of the Communications Act, the Commission may approve a transfer of control if, after weighing “the potential public interest harms of the [transaction] against the public interest benefits,” it concludes that, “on balance,” doing so would serve the public interest, convenience, and necessity.² Accordingly, where the potential harms from a proposed transaction are great, the potential benefits must be great; conversely, where the potential harms (if any) are small or limited, the potential benefits need only be of a similar scale.³

As an initial matter, one of the factors the Commission considers in its public interest inquiry is whether the proposed transferee holds the requisite “citizenship, character, financial, technical and other qualifications” to control an FCC licensee.⁴ Rockwell Collins is financially and technically qualified to hold ultimate control of the ARINC licenses. Indeed, Rockwell Collins has previously and repeatedly been found qualified to hold and/or control FCC licenses.⁵

Transfer of control of ARINC to Rockwell Collins will serve the public interest for several reasons. The transaction will bring together two leading players in the growing field of aviation information management, combining ARINC’s trusted networks and services with the industry leading avionics and cabin technologies developed by Rockwell Collins. ARINC’s customer base, high customer retention rates, and subscription business model will help Rockwell Collins achieve accelerated growth and benefit from greater earnings consistency throughout the

commercial aviation business cycle. The combination will be instrumental in providing new integrated information management solutions to customers.

ANSWER TO QUESTION 20

This application for transfer of control of international Section 214 authorization qualifies for streamlined processing pursuant to Section 63.12(c). The Transferee is not a foreign carrier and is not affiliated with any foreign carriers.
