IV. Public Interest Statement

The Transaction furthers the public interest, convenience and necessity. DTC provides local exchange and other telecommunications service to approximately 1,025 subscribers through five exchanges in southwestern Nebraska. The Dalton, Gurley, Lodgepole, Dix and Bushnell exchanges cover 1,406 square miles across portions of Cheyenne, Deuel, Kimball counties in Nebraska and very limited portions of Banner and Morrill counties also in Nebraska.

ECI provides local exchange and other telecommunications service in its Elsie exchange to approximately 200 subscribers in Elsie (Perkins County), Nebraska. While ECI holds an international authorization to provide global resale service, this authorization is inactive.

DTI offers resold interstate interexchange and international services in and around the service areas of DTC and ECI and provides its international resold services under authority of authorization granted by the Commission to Newcastle.

Rye Telephone Company (“Rye”) (a small rural ILEC operating in the State of Colorado); South Park L.L.C. d/b/a South Park Telephone Company (“South Park”) (a small rural ILEC operating in a distinct other area in the State of Colorado from Rye); CableCo, LLC d/b/a Valley Long Distance (a resale interexchange carrier offering interstate interexchange and international resold long distance service in and around the service areas of both Rye and South Park); Zenda Telephone Company, Inc. (which, through various dba’s provides resold interstate interexchange and international long distance services in and around the service areas of Zenda, West Side, and Miller).

USConnect possesses the requisite financial and managerial resources to maintain, and improve, the services provided by all of the 214 Holders.

A. Continued Provision of High-Quality Service is Ensured

Following the Transaction, US Connect plans to continue to operate DTC and ECI as ILECs providing local exchange service to their respective customers, and DTI will continue to provide resold interstate interexchange and international service to its customers. Further, USConnect will bring greater financial resources to all of the 214 Holders.

Customers will be notified of the transaction as required by the applicable state and federal laws and regulations.

B. No Anti-Competitive Issues are Present

The Transaction does not present any anti-competitive issues. DTI's total market share, combined with that of equity owners of USConnect, is less than ten percent (10%) of the interstate interexchange and international telecommunications markets. There remain other interexchange carriers operating in the Nebraska areas where the 214 Holders will continue to market their services.

In summary, the Transaction has no potential to harm the public interest and is expected to preserve and increase competition in the domestic and international telecommunications markets.

(i) Section 63.18(i) calls for a certification as to whether or not the applicant is, or is affiliated with, a foreign carrier. Transferees hereby certify that neither is a foreign carrier and neither is affiliated with a foreign carrier.

(j) Section 63.18(j) calls for a certification as to whether or not the applicant seeks to provide international telecommunications services to any destination country for which any of the following is true:

(1) The applicant is a foreign carrier in that country. Transferees hereby certify that neither is a foreign carrier in any destination country.

(2) The applicant controls a foreign carrier in that country. Transferees hereby certify that neither controls a foreign carrier in any destination country.

(3) Any entity that owns more than 25 percent of the applicant, or that controls the applicant, controls a foreign carrier in that country. Transferees hereby certify that no entity that controls a foreign carrier in any destination country owns more than 25 percent of either of the Transferees.

(4) Two or more foreign carriers (or parties that control foreign carriers) own, in the aggregate, more than 25 percent of the applicant and are parties to, or the beneficiaries of, a contractual relation (e.g., a joint venture or market alliance) affecting the provision or marketing of international basic telecommunications services in the United States. Transferees hereby certify that the foregoing statement is not true as relating to each Transferee.

(k) Section 63.18(k) calls for one of certain showings by the applicant for any destination country listed by the applicant in response to paragraph (j). Based upon Transferees' certifications in response to Section 63.18(j), no showing is required of Transferees in response to Section 63.18(j).

(l) In response to Section 63.18(l), Transferees do not propose to resell the international switched services of an unaffiliated U.S. carrier for the purpose of providing international telecommunications services to a country where it is a foreign carrier or is affiliated with a foreign carrier.

(m) Transferees hereby respond to Section 63.10(m) by confirming that neither is a foreign carrier, and neither is affiliated with a foreign carrier. Transferees satisfy the requirements of Section 63.10(a)(1) to be presumptively classified as "non-dominant" for the provision of international communications services.

(n) Transferees certify that neither has agreed to accept special concessions directly or indirectly from any foreign carrier with respect to any U.S. international route where the foreign carrier possesses market power on the foreign end of the route and will not enter into such agreements in the future.

(o) With reference to §§ 1.2001 through 1.2003 of the Commission's rules, Applicants certify that no party to the application is subject to a denial of Federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988. See 21 U.S.C. 853a.

(p) Applicants request streamlined processing of this application pursuant to Section 63.03(b)(2)(iii) of the Commission's Rules. Consummation of the proposed transaction would result in a market share in the interstate, interexchange market of less than 10% among Transferees and their affiliates. Similarly, the local exchange affiliates and subsidiaries of

Transferees would have, collectively, fewer than 2% of the subscriber lines installed in the aggregate nationwide. Finally, the transaction would result in no new overlapping or adjacent local service areas.

VI. Additional Information Required by Section 63.04(b) of the Commission's Rules or Assignment/Transfer of Control

In response to requirements of Section 63.04(b) of the Commission's rules, the additional information required by Sections 63.04(a)(6) through 63.04(a)(12) is provided in Exhibit A to this application.

VII. Conclusion

In view of the foregoing, Applicants respectfully submit that the public interest, convenience and necessity would be furthered by grant of this application.

Respectfully submitted,
