**Application of Intelsat LLC
To Modify Authorization**

Intelsat LLC ("Intelsat") hereby submits a request for modification of a space station authorization to permit relocation pursuant to a deployment plan change.

Specifically, Intelsat requests authority to make the following modification to its authorization for the satellite listed below:

1. **INTELSAT 605** (S2394), File No. SAT-A/O-20000119-00008.
Intelsat requests modification of its license to relocate INTELSAT 605 from 27.5° W.L. to 32.9° E.L. Intelsat plans to start the relocation of the INTELSAT 605 satellite in March/April 2003 and have the satellite at the 32.9° E.L. location in May/June 2003.

As explained in the following sections, grant of the instant modification application will serve the public interest by enabling Intelsat to implement deployment plan changes to respond to customer demands and ensure continuity of service. The

requested modification will not adversely affect any party, and the number of orbit locations assigned to Intelsat will not increase.

In accordance with the requirements of Section 25.117(d) of the Commission's Rules, 47 C.F.R. § 25.117(d), a completed FCC Form 312 is attached for this modification.

I. BACKGROUND

On August 8, 2000, the Commission granted Intelsat's application for authority to operate 17 in-orbit C-band and Ku-band satellites then owned and operated by the International Telecommunications Satellite Organization ("INTELSAT"). The Commission also granted Intelsat authority to construct, launch and operate 10 planned satellites. The authorization also allowed Intelsat to relocate, among 22 orbit locations, certain currently operating satellites upon the launch of the 10 planned satellites.¹

As explained in Intelsat's original application, in order to accomplish its diverse mission, the Intelsat system will be a dynamic system that is quick to respond to business demands and customer needs. To this end, Intelsat regularly relocates its satellites to optimize satellite usage, satisfy customer requirements and maximize the utilization of orbital resources.²

¹ See *Application of Intelsat LLC for C-Band and Ku-Band Global Satellite System* (filed Jan. 18, 2000); *Applications of Intelsat LLC for Authority to Operate and to Further Construct, Launch, and Operate C-Band and Ku-Band Satellites that Form a Global Communications System in Geostationary Orbit*, 15 FCC Rcd 15460 (2000) (Memorandum Opinion Order and Authorization) ("Intelsat Order"), *recon. denied*, 15 FCC Rcd 25234 (2000) (Order on Reconsideration).

² See, e.g., *Application of Intelsat LLC to Modify Authorizations to Operate, and to Further Construct, Launch, and Operate C-band and Ku-band Satellites that Form a*

The instant application for modification of the INTELSAT 605 license is the result of further evaluation and refinement of Intelsat's satellite deployment plan to meet its customers' needs. The requested modification is fully described below.

II. PROPOSED MODIFICATION

INTELSAT 605 was originally authorized to operate at 27.5° W.L. until January, 2002 and then be relocated to 20.0° W.L.³ In February 2002, Intelsat informed the FCC that the authorized relocation would not take place until a later date.⁴ Intelsat now seeks modification of the INTELSAT 605 license to relocate the satellite to 32.9° E.L., rather than to 20.0° W.L., upon the launch and deployment of the INTELSAT 907 satellite at 27.5° W.L.⁵

The deployment and transfer of traffic from INTELSAT 605 to INTELSAT 907 is planned for March/April 2003. The relocation of the INTELSAT 605 spacecraft to the

Global Communications System in Geostationary Orbit, 16 FCC Rcd 16208 (2001) (Order and Authorization).

³ See *Intelsat Order*, 15 FCC Rcd at 15531 (Appendix, Table 3).

⁴ See Letter from Jennifer D. Hindin, Wiley Rein & Fielding LLP, to William F. Caton, FCC, *Notification Regarding Change in Redeployment Schedule, Intelsat 605; Call Sign: S2394*, File No. SAT-A/O-20000119-00008 (filed Feb. 6, 2002).

⁵ On September 18, 2002, Intelsat filed an application for modification of the INTELSAT 907 license to permit the deployment of the INTELSAT 907 satellite at 27.5° W.L. in first quarter of 2003 rather than at 31.5° W.L. in February 2003. The application was granted on December 31, 2002. See *Application of Intelsat LLC to Modify Authorization*, File No. SAT-MOD-20020918-00183 (filed Sept. 18, 2002) (stamp grant from Jennifer Gilsenan, FCC, to J. Hindin, Wiley Rein & Fielding, LLP, provided on Dec. 31, 2002).

32.9° E.L. orbital location will commence after completion of this traffic transition to INTELSAT 907. INTELSAT 605 is expected to be at the new orbital location in May/June 2003.

III. PUBLIC INTEREST SHOWING

The proposed modification in Intelsat's deployment plan will serve the public interest. Not only will the modification promote efficient use of the orbital arc, it will also provide Intelsat with the flexibility needed to manage its system and meet the needs of its customers.

The Commission has traditionally provided licensees with the flexibility to adjust to changed circumstances and best serve their customers' needs. In particular, licensees are routinely permitted to re-locate satellites in order to maximize their efficient use of orbital resources. For example, in approving AMSC's 1998 request to relocate one of its satellites, the Commission stated that licensees are "in a better position" to determine how to tailor their systems "to meet the particular needs of its customers."⁶ As a result, the Commission further explained, "the Commission will generally grant a licensee's request to modify its system, provided there are no compelling countervailing public interest considerations."⁷ The instant modification application is fully consistent with this policy. Intelsat simply proposes to respond to customer needs by operating the INTELSAT 605 satellite in a new orbital location after having secured continuity of service by deploying

⁶ See *AMSC Subsidiary Corporation*, 13 FCC Rcd 12316, 12318 (1998) (Order and Authorization).

⁷ *Id.*

a new satellite at the INTELSAT 605 satellite's current orbital location. After deploying INTELSAT 605 at 32.9° E.L., Intelsat plans to relocate INTELSAT 602, currently operating at that location, to a new orbital location.⁸ Importantly, the modification contemplated herein does not change the number or identity of the orbital locations previously authorized for use by Intelsat or available for assignment to other applicants. In addition, Intelsat will operate the INTELSAT 605 satellite at the new orbital location in accordance with the coordination agreements with nearby satellite operators, so this modification will not give rise to any coordination concerns.

Most importantly, the proposed modification will ensure continuity of service to Intelsat's customers, as well as provide service to new customers that desire such service. Some of these customers are in small and developing countries for which the Intelsat system continues to be the primary or sole source of international connectivity. Prompt grant of the instant application will ensure that there is no disruption in service on these and other routes currently served by Intelsat.

⁸ Intelsat will file shortly an application for modification of the INTELSAT 602 license.

IV CONCLUSION

For the reasons explained in the previous sections, Intelsat requests modification of its authorization for INTELSAT 605 to permit relocation of the satellite to a new orbital location.

Respectfully submitted,

Intelsat LLC
