Dear Ms. Dortch:

On August 11, 2004, the Commission grant stamped the above-referenced application filed by PanAmSat Licensee Corp. ("PanAmSat") for authority to launch and operate Galaxy 15 at 133.0° E.L. Condition 7 of the grant requires PanAmSat to submit a written statement identifying "known satellites located at, or planned to be located at, PanAmSat's assigned orbital location, or assigned in the vicinity of that location such that the station-keeping volume of the respective satellites might overlap" and stating the measures that will be taken to prevent in-orbit collisions with these satellites.

Marlene H. Dortch

October 1, 2004

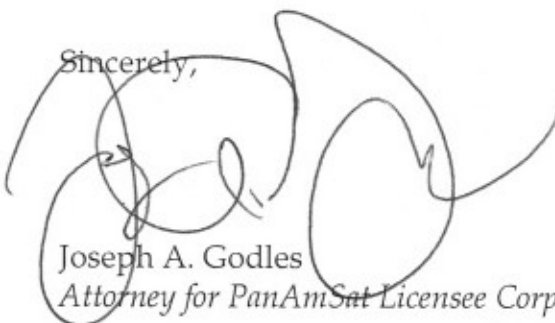

Page 2

PanAmSat is the licensee of Galaxy 1R, the only known satellite located, or planned to be located, in the vicinity of Galaxy 15's 133° W.L. assigned orbital location. PanAmSat is not aware of any other FCC licensed systems, or systems applied for and under consideration by the FCC, in the vicinity of this orbital location. Likewise, PanAmSat does not believe there are any systems in the vicinity of this orbital location that are the subject of ITU filings and are progressing towards launch.

Accordingly, there are no other operators with which PanAmSat must coordinate to prevent in-orbit collisions with Galaxy 15. PanAmSat has internal procedures in place to ensure that Galaxy 1R will not collide with Galaxy 15.

Please direct any questions concerning this filing to the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph A. Godles". The signature is stylized with large loops and a long horizontal stroke extending to the right.

Joseph A. Godles  
*Attorney for PanAmSat Licensee Corp.*
