DRAFT TEXT FOR SUBMISSION TO FCC FOR ITEM 8 OF THE GRANT

The Administration of USA would like to inform the ITU that a US licensed satellite, INTELSAT 702, has been authorized to provide Fixed Satellite Services in C (3700-4200/5925-6425 MHz) and Ku band (10.95-11.2, 11.45-11.7, 11.7-11.95, 12.5-12.75/14.0-14.5 GHz) within its designated service areas, from 54.85E Geo-Stationary Orbit location.

The satellite will be operated in accordance with the Table of Frequency Allocations of the Radio Regulations.

Intelsat has demonstrated that the intended operations will not cause potential excess interference to other adjacent operating satellite systems. However, these operations have been authorized only under the Radio Regulatory provision 4.4.

This information is being submitted for its possible relevance to the provisions of Article 8 of the Radio Regulations.
