**Re: Further Supplement to Response of Lockheed Martin Corporation to May 10, 2004 Commission Letter, File Nos. SAT-LOA-19990427-00046, SAT-AMD-20030730-00151, SAT-AMD-20040130-00008, SAT-AMD-20040205-00012, SAT-AMD-20040524-00106 and SAT-AMD-20041012-00197**

Dear Mr. Tycz:

Lockheed Martin Corporation ("Lockheed Martin"), by its attorneys, hereby submits this letter pursuant to Section 1.65 of the Commission's Rules, 47 C.F.R. § 1.65, into the above-referenced proceeding regarding its proposed radionavigation-satellite service ("RNSS") space station to be established on board a satellite of the Telesat Canada Corporation ("Telesat") at the 107.3° W.L. orbital location later this year.

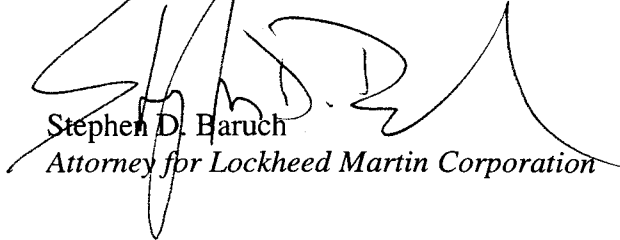

On March 1, 2005, Lockheed Martin wrote the Commission to report under Section 1.65 that the definitization of the mechanism by which Lockheed Martin can exercise its direct and unilateral ability to turn off the RNSS payload on the Telesat satellite from a location in the United States became effective on February 25, 2005. The key documentation itself was provided to the Commission under the cover of a request for confidential treatment that was filed contemporaneously with the March 1 Section 1.65 statement. On June 29, 2005, Lockheed Martin and Telesat finalized a subcontract agreement between them that memorializes the payment and contractual obligations relating to the previously-described mechanism and incorporates by attachment the February 25 documentation Lockheed Martin previously provided to the Commission. As it has with related materials before, Lockheed Martin is providing the new subcontract agreement to the Commission under the cover of a request for confidential treatment that is being provided contemporaneously with this Section 1.65 statement.

Mr. Thomas S. Tycz
