Applications to Modify its 2 GHz MSS Spectrum Reservation,
IBFS File Nos. SAT-MOD-20070919-00129, and SAT-AMD-20071129-00166
Attachment – Conditions of Authorization

April 2, 2008

New ICO Satellite Services G.P.'s (New ICO) applications, IBFS File Nos. SAT-MOD-20070919-00129 and SAT-AMD-20071129-00166, to modify its 2 GHz MSS Spectrum Reservation (Spectrum Reservation), are GRANTED and the Commission's licensing database will reflect these changes.¹ Accordingly, New ICO's Spectrum Reservation is modified to reflect operation of the ICO-G1 satellite at the 92.85° W.L. orbital location using the 2000-2020 and 2180-2200 MHz frequency bands, and the 29.25-30.0 GHz (space-to-Earth) and 18.55 -18.8/19.7-20.2 GHz (Earth-to-space) frequency bands for feeder link transmissions and for on-station Tracking, Telemetry, and Control (TT&C) transmissions at 29.9955 GHz and 29.9995 GHz (command), and 20.1965 and 20.1985 GHz (telemetry), subject to the terms of the Spectrum Reservation, as amended, the technical specifications set forth in its applications, the conditions set forth below, and the Commission's rules.

1. New ICO's request for a waiver of 47 C.F.R. § 25.210(i) is GRANTED. Section 25.210(i) requires space station antennas in the Fixed-Satellite Service to provide cross-polarization isolation such that the ratio of the on-axis co-polarization gain to the cross-polarization gain of the antenna in the assigned frequency band shall be at least 30 dB within its primary coverage area. The cross-polarization requirement serves to minimize the interference between adjacent satellites when both are carrying analog video signals with highly peaked spectra. New ICO states that its Ka-band feeder link beams for the ICO G1 satellite provide minimum cross-polarization isolation of 24 dB for the receive beam, and 27 dB for the transmit beam. It also states the minimum cross-polarization isolation of the Ka-band TT&C horn antennas is 23 dB for both the receive and transmit directions. New ICO states that its downlink cross-polarization shortfall will not significantly increase the noise floor of adjacent Ka-band satellites. Accordingly, we grant this waiver request with the condition that the operation of the ICO G1 satellite shall not cause more interference to U.S. services being provided by any authorized system that is two-degree spacing compliant than would be caused if the ICO G1 satellite complied with Section 25.210(i). Further, New ICO shall not claim protection against interference to its operations caused by U.S. services being provided by the two-degree spacing compliant satellites if such interference results from failure of ICO G1 to comply with Section 25.210(i) of the Commission's rules.

2. New ICO's request for a partial waiver of 47 C.F.R. § 25.114(d)(3) is GRANTED. Section 25.114(d)(3) requires applicants to provide the predicted space station antenna gain contour(s) for each transmit and each receive antenna beam and nominal orbital location requested. New ICO has provided a representative uplink spot beam and a representative downlink spotbeam. Because the information provided by New ICO its Schedule S Form is

sufficient for us to determine whether the system meets the Commission's technical requirements, we grant New ICO's request for a partial waiver of Section 25.114(d)(3).

3. New ICO's request for partial waiver of 47 C.F.R. § 25.202(g) is DEFERRED. Section 25.202(g) requires applicants to conduct TT&C functions for U.S. domestic satellites at either or both edges of the allocated band(s) and to select frequencies, polarization, and coding that minimizes interference into other satellite networks and within one's own satellite system. New ICO proposes to use C-band frequencies between its satellite and a control station in the U.S. to transmit signals for transfer orbit and contingency operations. We will address requests for a waiver of Section 25.202(g) in the context of an earth station application that seeks authority to use C-band frequencies for its transfer orbit and contingency TT&C operations.

4. New ICO is afforded 30 days from the date of this action to decline the modifications to its Spectrum Reservation. Failure to respond within this period will constitute formal acceptance of the Spectrum Reservation as conditioned.

5. This action is issued pursuant to the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effectively immediately. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106 and 1.115, may be filed within 30 days of the date of the public notice indicating that this action was taken.
