Federal Communications Commission
Washington, DC 20554

In the Matter of

Intelsat License LLC

Application for Authority to Launch and Operate Intelsat 27, a Replacement Satellite With New Frequencies, at 304.5° E.L.

File No. SAT-AMD-_____
File No. SAT-LOA-20110610-00105

Call Sign: S2827

AMENDMENT OF APPLICATION
FOR AUTHORITY TO LAUNCH AND OPERATE INTELSAT 27, A
REPLACEMENT SATELLITE WITH NEW FREQUENCIES, AT 304.5° E.L.

Intelsat License LLC (“Intelsat”), pursuant to Section 25.116 of the Federal Communications Commission’s (“FCC” or “Commission”) rules,¹ hereby amends its pending application to launch and operate a replacement satellite, to be known as Intelsat 27, at the 304.5° E.L. orbital location. That pending application noted that the Intelsat 27 satellite will carry a UHF payload that will operate in non-commercial frequencies. It further stated that the 243.52-268.16 MHz and 292.835-317.33 MHz UHF frequencies will be coordinated, as appropriate, through NTIA consistent with U.S. Government requirements.

This amendment notifies the FCC that Intelsat no longer seeks U.S. authority to operate the UHF payload on Intelsat 27. Intelsat now plans to seek authority to operate the UHF payload from another Administration. The remainder of Intelsat’s pending

¹ 47 C.F.R. § 25.116.

application for authority to launch and operate the Intelsat 27 satellite remains unchanged and is incorporated by reference.

Respectfully submitted,

/s/ Susan H. Crandall
