AMENDMENT

On November 28, 2011, DIRECTV Enterprises, LLC ("DIRECTV") submitted information related to the anticipated operation of DIRECTV RB-1, a geostationary satellite in the 17/24 GHz Broadcasting Satellite Service ("BSS") authorized to operate at the nominal 99° W.L. orbital location. Such information must be submitted in applications for new 17/24 GHz BSS authorization, and current authorization holders are required to supplement the file with all required information.

Section 25.264(h)(2) provides that all operational 17/24 GHz BSS space stations must be maintained in geostationary orbits with an eccentricity of less than 0.00047. This is to confirm that the orbital eccentricity value for the DIRECTV RB-1 spacecraft will be approximately 0.00017.

Respectfully submitted,

DIRECTV ENTERPRISES, LLC

FCC File No. SAT-LOA-20060908-00099, SAT-AMD-20080114-00013, SAT-AMD-20080321-00076 (granted July 28, 2009).

See Establishment of Policies and Service Rules for the Broadcasting-Satellite Service at the 17.3-17.7 GHz Frequency Band and at the 17.7-17.8 GHz Frequency Band Internationally, and at the 24.75-25.25 GHz Frequency Band for Fixed Satellite Services Providing Feeder Links to the Broadcasting-Satellite Service and for the Satellite Services Operating Bi-directionally in the 17.3-17.8 GHz Frequency Band, 26 FCC Rcd. 8927, ¶ 64 (2011). The order also provides that no fee is required for modifications filed solely to comply with this requirement. See id., ¶ 66.

ENGINEERING CERTIFICATION

The undersigned hereby certifies to the Federal Communications Commission as follows:

- (i) I am the technically qualified person responsible for the engineering information contained in the foregoing Application,
- (ii) I am familiar with Part 25 of the Commission's Rules, and
- (iii) I have either prepared or reviewed the engineering information contained in the foregoing Application, and it is complete and accurate to the best of my knowledge and belief.
