SECOND MINOR AMENDMENT TO DIRECTV 1R APPLICATION

DIRECTV Enterprises, LLC ("DIRECTV") has filed an application for authority to operate DIRECTV 1R, a satellite in the Direct Broadcasting Satellite ("DBS") service, at the 56.16° E.L. orbital location, as well as a minor amendment to reflect updated information on its plan for drifting the satellite to its new location and the resulting impact on remaining life of the satellite. For various reasons, including considerations related to international spectrum coordination, DIRECTV has decided that locating the satellite at 55.8° E.L. and slightly re-pointing the beams would be preferable.

Accordingly, in this Application, DIRECTV amends its pending application to request authority to operate at this slightly different orbital location, and submits both revised link budgets and revised antenna gain contours in the attached Schedule S that reflect this change in position. In accordance with Section 25.117(d)(1) of the Commission's rules, DIRECTV identifies in this Application only those items of information that should be changed from its pending application. DIRECTV hereby certifies that the remaining information in its application (as amended) has not changed.

Respectfully submitted,

DIRECTV ENTERPRISES, LLC
