Re: Ex Parte Presentation
SES Americom, Inc. Application for the SES-3 C/Ku Band Replacement Satellite, File Nos.
SAT-RPL-20121228-00227 & SAT-AMD-20131113-00132, Call Sign S2892

Dear Ms. Dortch:

On February 7, 2014, the undersigned spoke on the telephone with Roderick Porter, Deputy Chief of the International Bureau, regarding the above-referenced application ("Application"). Mr. Porter was joined by Jose Albuquerque, Chief of the Satellite Division, and Karl Kensinger, Associate Division Chief of the Satellite Division. Mr. Porter provided information on the status of the Application with specific reference to the timing issues raised by NBCUniversal Media, LLC ("NBCUniversal") in an ex parte letter filed on January 16, 2014. That letter urged the Commission to act promptly on the Application, given the need to shift approximately 200 earth stations across the country that currently use the Ku-band capacity of AMC-1 to receive NBC Network programming. Each of the Ku-band antennas will need to be individually programmed and tested to reflect the polarization change. As explained in more detail in the letter, the timing of these shifts is very sensitive for the delivery of NBC Network programming.

Please direct any questions regarding this matter to the undersigned.

Respectfully submitted,

/s/ Margaret L. Tobey
