Dear Ms. Dortch:

Pursuant to Section 1.1206 of the Commission's rules, 47 C.F.R. § 1.1206, DISH Operating L.L.C. ("DISH") submits this letter summarizing a meeting on October 20, 2014 with staff from the International Bureau, Satellite Division as follows: Jose Albuquerque, Chief; Karl Kensinger, Deputy Division Chief; Chip Fleming, Chief Engineer; Stephen Duall, Policy Branch Chief; Kathryn Medley, Engineering Branch Chief; Joe Hill, Engineering Branch; Lynne Montgomery, Policy Branch; Rockie Patterson, Engineering Branch; and Merissa Velez. Present on behalf of DISH were Alison Minea, Director and Senior Counsel, Regulatory Affairs; Hadass Kogan, Associate Corporate Counsel; Jennifer Manner, Vice President, Regulatory Affairs for EchoStar Satellite Corporation ("EchoStar"); and Pat Amodio, Director of Spectrum Development for EchoStar.

During the meeting, we discussed DISH's blanket earth station license application for United States market access from the Canadian-licensed Ciel-6i payload at 103° W.L. We explained how grant of DISH's application will serve the public interest because it will permit DISH to use the Ciel-6i payload to explore the provision of video and data services for the terrestrial wireless broadband network planned by DISH. DISH also discussed the ITU priority of this slot and its reliance on this priority in developing the innovative services planned for this spectrum.

Respectfully submitted,

/s/ Alison A. Minea
