Washington, D.C. 20554

Re: Application to Launch and Operate Galaxy 14R (Call Sign S3016) and  
Amended Application to Launch and Operate Galaxy 15R (Call Sign S3015)  
File Nos. SAT-LOA-20170524-00079 and SAT-AMD-20170613-00086

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”), at the request of the International Bureau staff, hereby supplements its above-referenced Applications. Specifically, Intelsat is providing information on the general approach that Intelsat will use to ensure protection of U.S.-licensed, Non-Geostationary Satellite Orbit (“NGSO”) Fixed-Satellite Service (“FSS”) systems.

In its recent Report and Order updating to Parts 2 and 25 as related to NGSO systems, the Federal Communications Commission adopted a proposal to add a secondary FSS allocation in the 18.8-19.3 GHz band.<sup>1</sup> Additionally, the 18.8-19.3 GHz and 28.6-29.1 GHz bands are allocated to the NGSO FSS service on a primary basis in the United States. Accordingly, Intelsat acknowledges the use by, and commits to protecting the operations over the United States of all existing and future NGSO systems in the 18.8-19.3 GHz and 28.6-29.1 GHz frequency bands.

All other information set forth in the Applications remains unchanged. Please direct any further questions regarding this application supplement to the undersigned at (703) 559-6949.

Sincerely,

Cynthia J. Grady  
Regulatory Counsel  
Intelsat Corporation

cc: Kathryn Medley  
Jay Whaley

---

<sup>1</sup> This revised allocation will be effective 30 days after publication of the NGSO Report and Order in the Federal Register. *In the Matter of Update to Parts 2 and 25 Concerning Non-Geostationary, Fixed-Satellite Service Systems and Related Matters*, Notice of Proposed Rulemaking, 31 FCC Rcd 13651 (2016).
