

Attachment 2
Feeder Link Steerable Beam Characteristics
New Spectrum Satellite Ltd

Representative single feeder link nadir pointing downlink 19 GHz beam contours, showing -2, -4, -6, -8, -10, -15, and -20 dB contours from peak. Uplink Feeder 29 GHz link beams are congruent with this. TT&C channels also use these beams. All feeder link steerable beams are identical, each steered to a unique feeder link earth station.
