

Response to Question 36: Licenses Revoked or Applications Denied

Neither Telesat Canada nor any licensee subsidiary or affiliate of Telesat Canada has had any FCC station authorization or license revoked or had any initial, modification or renewal application for an FCC station authorization, license, or construction permit denied by the Commission.

Out of an abundance of caution, however, we note (as has been noted before in many applications filed by Telesat Canada and its subsidiaries and affiliates) the following information with respect to certain entities that are owned by Loral Space & Communications, Inc. ("Loral Space"), which is a shareholder of Telesat Canada:

In an order issued April 1, 2003, the International Bureau declared null and void authorizations held by Loral SpaceCom Corporation and Loral Space & Communications Corporation to construct, launch and operate geostationary Fixed Satellite Service Ka-band payloads at 89° W.L., 81 ° W.L., 47° W.L., and 78° E.L.¹ The Bureau affirmed its earlier decision not to extend the construction milestones associated with these authorizations.²

In an order issued July 7, 2005, the International Bureau declared null and void, by its own terms, Loral SpaceCom Corporation's authorization to launch and operate a satellite at the 69° W.L. orbit location.³

In an order issued September 26, 2005, the International Bureau declared null and void, by its own terms, CyberStar Licensee, LLC's Ka-band system authorization to launch and operate satellites at the 93° W.L. and 115° W.L. orbital locations.⁴
