To: The Chief, International Bureau

Motion for Stay of First-Round Licensing Matters

Pegasus Development Corporation (“Pegasus”), by its attorneys, and pursuant to Section 1.43 of the Commission’s rules, hereby moves for a stay of all first-round licensing matters¹ pertaining to the GSO Ka-band orbital spectrum pending action on the Motion to Consolidate First and Second-Round Licensing Matters that Pegasus is simultaneously filing. That motion further describes the important public interest considerations that demand a stay of the above-

¹ Attachment A contains a list of the relevant pending matters.

referenced proceedings and consolidation of all first-round matters with the resolution of pending second-round licensing applications.

Under prevailing precedent, the Commission considers four factors in determining whether to grant a request for a stay: whether (1) the movant has a substantial likelihood of succeeding on the merits; (2) whether the movant would suffer irreparable harm absent a stay; (3) whether grant of a stay would not substantially harm others; and (4) whether the stay would be in the public interest. *See Washington Metropolitan Transit Comm. v. Holiday Tours, Inc.*, 559 F.2d 841, 842-43 (D.C.Cir. 1977) (hereinafter “*WMATC*”). However, the necessary showing to establish a likelihood of success on the merits is governed by the “balance of equities as revealed through examination of the other factors.” *Id.* at 844.

This Motion meets the test set forth in *WMATC*. First and foremost, a stay of the first-round licensing matters and consolidation of those matters with the second round will clearly serve the public interest. The Commission has to act quickly to prevent the lapse of the United States international rights to the Ka-band spectrum. To date, the record evidences four years of unresolved licensing matters involving the first and second rounds. If the Commission does not act quickly and enforce the rigorous timetables it originally proposed, the United States will lose its opportunity to use valuable spectrum. Therefore, a stay of all first-round matters and consolidation of those matters with the second round in order to resolve all pending licensing matters is the only efficient and reasonable approach.²

² *See Separate Statement of Commissioner Gloria Tristani In the Matter of Cumulus Licensing Corp (Assignor) and Clear Channel Broadcasting Licenses, Inc. (Assignee), FCC No. 00-391* observing with respect to a stay request that “[m]eaningful allegations that the public interest is not served by Commission action should cause a lightening of the burden on the petitioner similar to the lesser burden on government agencies seeking injunctions to protect the public interest.”

Second, grant of a stay will not substantially harm others. In fact, consolidation and prompt resolution of all outstanding matters affecting the first and second rounds will benefit all parties because it will more quickly resolve competing claims. On the other hand, dealing with first-round matters on a piecemeal basis will lead to more litigation, more delay in providing Ka-band service and more difficulties in determining second round matters.

Third, Pegasus (and other second-round applicants) will suffer irreparable harm if a stay of first-round matters is not granted. As set forth in the Motion to Consolidate, the first-round matters involve key CONUS orbital locations whose immediate availability is critical to the successful resolution of the second-round licensing process. A piecemeal approach, in which the Commission resolves first-round matters before it fully understands how it will resolve the second-round licensing process is likely to lead to overall delay. Such delay will doom the ability of second-round applicants to be licensed in time to bring their satellites into use by the relevant International Telecommunications Union deadlines. Satellite construction and launch requires several years of lead time, such that the second-round must be resolved very soon. Continued delay in Commission action to enforce the milestones on these first-round applications means that Pegasus and other second round applicants cannot obtain licenses, and by the time there is action, the spectrum could be lost.

Finally, Pegasus has a substantial likelihood of succeeding on the merits of its Motion to Consolidate because consolidation is the only practical and sensible approach to resolving the matter of preventing warehousing and trafficking of spectrum by first-round licensees and providing the public with advanced digital services through the Ka-band orbital slots.

Accordingly, for the reasons set forth herein and in the Motion to Consolidate, Pegasus Development Corporation respectfully requests the Commission to stay all first-round licensing matters and consolidate them with the pending second-round applications.

Respectfully submitted,

PEGASUS DEVELOPMENT CORPORATION
