Re: **EchoStar Satellite Operating Corporation, Application for Minor Modification of DBS Authority and to Launch and Operate EchoStar 10 at 110° W.L., File No. SAT-MOD-1125-00254 and File No. SAT-MOD-20051221-00267**

Dear Ms. Dortch:

After a conversation with Bureau staff, EchoStar Satellite Operating Corporation ("EchoStar") files this supplemental letter to clarify that EchoStar's intent since the filing of the original application on November 25, 2005, has always been that the GBLR.gxt file in the Schedule S represent the global Telemetry, Tracking, and Command receive beam, and not a narrowly focused spot beam. As explained by Richard Barnett in his statement filed today, the GXT file data were correctly loaded into the Schedule S software to identify properly that global beam. The GBLR.gxt file in the separate Zip file containing the GXT files, provided by email, contains the correct data. Please contact me if you have any questions about EchoStar's application.

Respectfully yours,

Pantelis Michalopoulos
Counsel for EchoStar Satellite Operating
Corporation
