VIA HAND DELIVERYMarlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554**Re: Notice of *Ex Parte* Presentations, File No. SAT-LOA-20070622-00085
EchoStar Satellite Operating, L.L.C. Application for Authority to
Launch the EchoStar 11 Satellite and to Operate that Satellite at 110°
W.L.,**

Dear Ms. Dortch:

On August 18, 2008, David Wilson of Spectrum Five, LLC ("Spectrum Five") participated in a phone call with Aaron Goldberger of Chairman Martin's office to reiterate the arguments made in its August 8, 2008 letter to the Commission in the above-referenced application.

On August 20, 2008, David Wilson, along with Richard E. Wiley and the undersigned, counsel to Spectrum Five, participated in a telephone call with International Bureau Chief Helen Domenici, Charles Mathias of the Wireline Competition Bureau, and Aaron Goldberger and Brent Greenfield of Chairman Martin's office. During the call, Spectrum Five noted that the ITU has not yet published the information required by Appendix 4 of the ITU Radio Regulations submitted in May 2008 with respect to the EchoStar 11 satellite. Accordingly, Spectrum Five's sponsoring Administration, the Netherlands, has had no opportunity even to review EchoStar's proposed modifications to the Region 2 BSS Plan before the satellite was launched. Spectrum Five possesses ITU priority with respect to Dish Network's May ITU filing and has been granted market access to serve the United States. Spectrum Five seeks to ensure that its ITU priority rights can be effectively enforced by the Commission notwithstanding the anticipated future service disruptions to Dish Network subscribers if EchoStar 11 commences service at 110° W.L. prior to completion of coordination with Spectrum Five. Spectrum Five has attached a February 2007 letter to EchoStar requesting technical information for coordination. To date, EchoStar has not responded to the request.

Accordingly, Spectrum Five requested that the Commission clarify the conditions imposed on EchoStar 11 so that it may not operate at power levels exceeding that of

Marlene H. Dortch

Page 2

EchoStar 8 until DISH Network (1) coordinates with the Netherlands or (2) provides explicit technical information to demonstrate that such coordination can be effected.

Pursuant to the Commission's rules, a copy of this letter is being filed for inclusion in the above-captioned proceeding. Please direct any questions about this matter to the undersigned.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Todd M. Stansbury". The signature is stylized and somewhat cursive, with a large initial "T" and "S".

Richard Blair
Echostar Communications Corp.
9601 S. Meridian Blvd
Englewood, CO 80112

Dear Mr. Blair,

I have been retained by Spectrum Five LLC to initiate coordination negotiations relating to Spectrum Five's satellite to be located at 114.5W and BSS satellites at 110W and 119W. It is our intention to review your satellite networks and to present a proposed technical plan for a coordination settlement.

The first Spectrum Five satellite is expected to be launched during 2010. Therefore, we request that you identify the satellites and transponders that you intend to operate at the nominal locations of 110W and 119W in 2010 and beyond.

We would appreciate any additional information concerning these networks that you would care to provide to us.

You may reach me at the letterhead address or 610-644 0444 (Philadelphia) or jondonkies@aol.com

Sincerely

John D. Kiesling
Consultant to Spectrum Five
