Re: Notice Regarding Intelsat 31  
Call Sign S2924; File No. SAT-LOA-20140410-00038

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) hereby notifies the Federal Communications Commission of a change with respect to a statement made in the Engineering Statement of the above referenced application regarding satellite deployment. Specifically, in the Intelsat 31 Engineering Statement, Intelsat noted that Intelsat 30 (Call Sign 2887) also would operate at 95.05° W.L. and stated that “Galaxy 3C also operates at 95.05° W.L. (see FCC File Number: SAT-MOD-20060303-00019); however, it is expected that this spacecraft will be relocated to another orbital location upon the arrival of Intelsat 31.”<sup>1</sup> Intelsat now plans, at least temporarily, to fly all three satellites – Galaxy 3C (Call Sign 2381), Intelsat 30, and Intelsat 31 – in the same +/- 0.05° station-keeping box centered on 95.05° W.L.

Please direct any questions to the undersigned at (703) 559-7848.

Sincerely,

Susan H. Crandall  
Associate General Counsel  
Intelsat Corporation
