

Antenna Gain Contours for Beams UD2C, UD2D, UD3C, UD3D

Contours are plotted on the surface of the Earth with the peak antenna gain pointed at nadir to a latitude and longitude within the proposed service area.

Contours are at -2 dB, -4 dB, -6 dB, -8 dB, -10 dB, -15 dB and -20 dB relative to beam peak.

Axes are plotted in azimuth (east-west) and elevation (north-south).
