ATTACHMENT TO GRANT
 Astro Digital U.S., Inc.
 IBFS File No. SAT-LOA-20170508-00071

IBFS File No(s):	SAT-LOA-20170508-00071	GRANT IN PART/ DEFER IN PART – With Conditions  International Bureau Satellite Division
Licensee/Grantee:	Astro Digital U.S., Inc. (Astro Digital)	
Call Sign:	S3014	
Satellite Name:	Landmapper constellation	
Orbital Location: (required station-keeping tolerance)	Non-Geostationary Orbit (NGSO) at altitudes between 475 km and 625 km (see scope of grant below)	
Administration:	United States of America	
Nature of Service:	Earth Exploration Satellite Service (EESS)	
Scope of Grant:	Authority to construct, deploy, and operate up to five (5) satellites, operating at orbital altitudes between 475 and 625 km, to provide EESS. ¹	
Prior Grant(s):	Authority to construct, deploy, and operate one Landmapper-BC satellite to provide EESS at orbital altitudes between 475 and 625 km. Acceptance of showing that Astro Digital’s proposed operations in the 29.9-30.0 GHz band can be conducted on a non-interference basis to co-frequency MSS and FSS operators in the band. <i>See</i> condition 4, below. Grant of waiver of the requirement to use ITU software to demonstrate EPFD compliance with the same ITU Article 22 limits applicable to NGSO FSS operations in the 29.9-30.0 GHz band. <i>See</i> condition 5, below. ²	
Service Area(s):	Global	
Frequencies:	25.5-27.0 GHz (space-to-Earth) (data downlink) 29.9-30.0 GHz (Earth-to-space) (data flow control) ³	

¹ Astro Digital requested authority to construct, deploy, and operate a constellation of up to 100 satellites over a period of 15 years, with no more than 30 satellites operational at one time, operating at orbital altitudes between 475 and 625 km. In December 2017, the Satellite Division granted Astro Digital’s request for one Landmapper-BC satellite scheduled for launch in December 2017 and deferred action on the remainder of Astro Digital’s request. IBFS File No. SAT-LOA-20170508-00071 (grant stamped Dec. 14, 2017). The five satellites authorized include the one Landmapper-BC satellite previously authorized in December 2017. We defer action on the remainder of Astro Digital’s request to construct, deploy, and operate satellites in excess of the five satellites authorized.

² The Satellite Division issued a further grant in part/defer in part in April 2018 to address Astro Digital’s compliance with conditions 4 and 5 in the initial grant. *See* IBFS File No. SAT-LOA-20170508-00071 (grant stamped April 12, 2018).

³ Astro Digital’s application was placed on public notice on August 25, 2017. *Satellite Policy Branch Information Space Station Applications Accepted for Filing*, Public Notice, and Report No. SAT-01262 (Aug. 25, 2017). Telesat Canada filed a petition to deny, asserting that Astro Digital’s use of the 29.9-30 GHz band would interfere with Telesat’s use of this band, and that Astro Digital’s operations are inconsistent with the Ka-band plan and it did not file the appropriate waiver. *See* Petition to Deny of Telesat Canada (filed Sept. 25, 2017). The Commission’s Ka-band plan restricts the use and licensing of the Ka-band beyond those indicated in section 2.106. Because Section 2.106 has no allocation for EESS in the 29.9-30.0 GHz band, however, Astro Digital’s request for a waiver of the U.S. Table of Allocations is appropriate for its proposed non-conforming use of the 29.9-30.0 GHz band. Astro Digital’s operations must be on a non-interference basis to other authorized users in the band thereby resolving Telesat’s concerns and eliminating them as a basis for denying Astro Digital’s application. *See* Petition to Deny of Telesat Canada (filed Sept. 25, 2017) and Astro Digital’s Consolidated Opposition and Response (filed Oct. 11, 2017).

ATTACHMENT TO GRANT
Astro Digital U.S., Inc.
IBFS File No. SAT-LOA-20170508-00071

	1615-1617.775 MHz (space-to-space) ⁴ 2483.5-2495 MHz (space-to-space) Telemetry, Tracking, and Command (TT&C) frequencies: 400.5 MHz (space-to-Earth) and 402.8-403 MHz (Earth-to-space)
<p>Unless otherwise specified herein, operations under this grant must comport with the legal and technical specifications set forth by the applicant or petitioner and with Federal Communication Commission's rules not waived herein. This grant is also subject to the following conditions:</p> <ol style="list-style-type: none">1. Astro Digital must prepare the necessary information, as may be required, for submission to the International Telecommunication Union (ITU) to initiate and complete the advance publication, coordination, due diligence, and notification process for these space stations, in accordance with the ITU Radio Regulations. Astro Digital shall be held responsible for all cost-recovery fees associated with ITU filings. No protection from interference caused by radio stations authorized by other administrations is guaranteed unless coordination and notification procedures are timely completed or, with respect to individual administrations, by successfully completing coordination agreements. Any radio station authorization for which coordination has not been completed may be subject to additional terms and conditions as required to effect coordination with the frequency assignments of other administrations. <i>See</i> 47 CFR § 25.111(b).2. In the 25.5-27.0 GHz band, operations are limited to five (5) satellites in accordance with the coordination agreement reached between Astro Digital and U.S. Federal agencies. Any additional use beyond five satellites shall require additional coordination with U.S. Federal operations and additional authorization from the Federal Communications Commission.3. In the 25.5-27.0 GHz band, power flux-density from operations must not exceed the limits in Section 25.208(p), Table 21-4 of the International Telecommunication Union's (ITU) Radio Regulations, and the limits and guidelines in Recommendation ITU-R SA.1862 must be followed.4. In the 25.5-27.0 GHz band, operations are subject to footnote US258 of the U.S. Table of Frequency Allocations, 47 CFR § 2.106, which provides that this band is allocated on a primary basis for non-Federal EESS (space-to-Earth), subject to a case-by-case electromagnetic compatibility analysis.5. In the 29.9-30.0 GHz band, we grant Astro Digital's request to waive the United States Table of	

⁴ Astro Digital will operate in the 1615-1617.775 MHz band pursuant to Globalstar's authorizations. Globalstar is currently authorized to operate its space stations in the 1610-1617.775 MHz frequency band on an exclusive basis, and in the 1617.775-1618.725 MHz band on a shared basis with Iridium. Iridium filed comments stating that Astro Digital did not address co-frequency or adjacent band interference issues with the Iridium service links. *See* Comments of Iridium Constellation LLC (filed Sept. 25, 2017). With the frequencies requested by Astro Digital there is no co-frequency sharing with Iridium. In addition, based on our analysis, Astro Digital's out-of-channel emissions in the nearest Iridium channel would result in a carrier-to-interference ratio of approximately 32 dB. We conclude, therefore, that the impact of Astro Digital's out-of-channel emissions on Iridium's operations would be negligible, and find no reason to further condition Astro Digital's use of this band as requested by Iridium. Iridium also filed comments requesting that the Satellite Division defer further action on the application pending the outcome of a rulemaking addressing use of ISLs in non-ISL bands (IB Docket No. 18-86). In addition, Iridium states that it has been granted special temporary authority (STA) to operate above 1616 MHz band, and that in these instances Astro Digital must cease operations in the band. We find no reason to defer Astro Digital's use of this band or that this grant will prejudice the outcome of the rulemaking. Further, we note that Iridium's limited use of this band for STAs has been on a non-inference basis. In the event Iridium needs an STA to use these frequencies, we will address it on a case-by-case basis. *See* Letters to Jose Albuquerque, Chief, Satellite Division, from Joseph Godles, Counsel for Iridium Constellation, LLC, filed November 21, 2017 and June 4, 2018, and response of Astro Digital, Letter to Jose Albuquerque, Chief, Satellite Division, from Tony Lin, Counsel for Astro Digital US, Inc. filed June 19, 2018.

ATTACHMENT TO GRANT
Astro Digital U.S., Inc.
IBFS File No. SAT-LOA-20170508-00071

Frequency Allocations to permit EESS operations in this band as proposed.⁵ Operations, however, must be conducted on a non-interference basis with respect to Mobile Satellite Service (MSS) and Fixed Satellite Service (FSS), including licensees and grantees of U.S. market access in the NGSO FSS processing round.⁶ Further, Astro Digital shall not claim protections from systems operating in accordance with the U.S. Table of Frequency Allocations. *See* 47 CFR § 2.106. Astro Digital has submitted a showing that its operations in the 29.9-30.0 GHz band can be conducted on a non-interference basis to co-frequency MSS and FSS operators in the band.⁷ In accordance with this showing, Astro Digital must coordinate its operations with MSS and FSS systems in the 29.9-30.0 GHz band to avoid interference to such systems, including licensees and grantees of U.S. market access in the NGSO FSS processing round.

6. Astro Digital's authorization to construct, launch, and operate one Landmapper-BC satellite was conditioned on Astro Digital submitting to the Commission its input parameters and the simulation output results, using approved ITU EPFD simulation software, demonstrating EPFD compliance with the same ITU Article 22 limits applicable to NGSO FSS operations in the 29.9-30.0 GHz band.⁸ Astro Digital submitted the required information using an alternative methodology which demonstrated that it could meet the EPFD limits in ITU Article 22 by limiting its operational angle to no less than 7° above the horizon when pointing toward the GSO arc.⁹ Based on the limited size of its 30-satellite system and its use of a single Ka-band earth station with limited visibility to the geostationary arc, Astro Digital requested a waiver of the requirement to use ITU software to show compliance.¹⁰ We grant Astro Digital's request for a waiver and find that it has demonstrated that its uplink transmissions in the Ka-band frequencies can operate within the limits contained in ITU Article 22 and protect co-frequency GSO satellites.¹¹ Accordingly we condition this grant on Astro Digital operating its earth station pursuant to the technical demonstration provided in its *January 16 Letter*.

7. Astro Digital's request for a waiver to operate TT&C links in the 402.8-403 MHz frequency band is granted. Astro Digital shall tune TT&C UHF links to an agreed frequency range with NOAA to minimize interference to NOAA GOES Data Collection System (DCS) and radiosonde operations, and continue to work closely with NOAA to identify and implement any further measures needed to avoid radio frequency interference

⁵ For Earth-to-space transmissions, the International Table allocates 28.5-30.0 GHz to EESS on a secondary basis in Regions 1, 2, and 3.

⁶ Public Notice, Satellite Branch Policy Information, *OneWeb Petition Accepted for Filing IBFS File No. SAT-LOI-20160428-00041 Cut-Off Established for Additional NGSO-like Satellite Applications or Petitions for Operations in the 107-12.7 GHz, 14.0-14.5 GHz, 17.8-18.6 GHz, 18.8-19.3 GHz, 27.5-28.35 GHz, 28.35-29.1 GHz, and 29.5-30.0 GHz Bands*, 31 FCC Red 7666 (July 15, 2016). Astro Digital filed its application to operate its NGSO system in the 29.9-30 GHz band on May 8, 2017, after the November 15, 2016, cut-off date established for such systems.

⁷ Letter to Jose Albuquerque, Chief, Satellite Division, FCC, from Tony Lin, Counsel for Astro Digital U.S. Inc. (March 14, 2018).

⁸ Astro Digital U.S. Inc, IBFS File No. SAT-LOA-20170508-00071 (grant stamped Dec. 14, 2017), condition 5. *See also* <http://www.itu.int/en/ITU-R/software/Pages/epfd.aspx>.

⁹ Letter to Jose Albuquerque, Chief, Satellite Division from Tony Lin, Counsel for Astro Digital U.S., Inc. (Jan. 16, 2018). (*January 16 Letter*).

¹⁰ *January 16 Letter* at 14.

¹¹ Telesat Canada opposed Astro Digital's waiver request, asserting that Astro Digital failed to show good cause as to why it should not have to use the ITU EPFD simulation software, and suggests that a grant would "open the door to every NGSO operator" seeking a similar waiver. Letter to Marlene H. Dortch, Secretary, FCC, from Joseph Godles, Attorney for Telesat Canada (Feb. 16, 2018). Astro Digital filed a response. *See* Letter to Jose Albuquerque, Chief, Satellite Division, from Tony Lin, Counsel for Astro U.S., Inc. (March 27, 2018). We find that Astro Digital's alternative methodology is sufficient to demonstrate compliance Digital with ITU Article 22. Given the size of its EESS system and use of a single earth station, we disagree that that this waiver will set a precedent for every NGSO operator to seek a similar waiver.

ATTACHMENT TO GRANT
Astro Digital U.S., Inc.
IBFS File No. SAT-LOA-20170508-00071

to these systems.

8. Astro Digital's TT&C operations in the space-to-Earth direction are limited to a center frequency of 400.5 MHz, except as necessary for a period immediately following (i) the deployment of the Landmapper BC-3 satellite or (ii) a Landmapper BC-3 satellite software reset, resulting in satellite transmissions returning to the default transmission channel, in both cases to allow for the retuning of transmissions from 400.175 MHz to 400.5 MHz.

9. Astro Digital's TT&C operations in the Earth-to-space direction are limited to a center frequency of 402.9 MHz, except as necessary for a period immediately following (i) the deployment of the Landmapper BC-3 satellite or (ii) a Landmapper BC-3 satellite software reset, resulting in the satellite returning to its default channel, in both cases to allow for the retuning of the satellite receive channel from 402.6 MHz to 402.9 MHz.

10. To mitigate harmful interference, the Landmapper-BC satellite downlink shall maintain a minimum distance of 4000 km from the NASA International Space Station (NORAD Designation 25544 or International spacecraft ID 1998-067A) during its UHF downlink sessions with a cooperating ground station. This condition is applicable to Landmapper-BC satellites with a satellite downlink center frequency of 400.500 MHz.

11. Astro Digital's request for a waiver of the modified processing round requirements of 47 CFR §§ 25.156 and 25.157 is granted. Astro Digital will be able to share spectrum with other EESS systems by time sharing its transmissions over the same geographic area. We grant this waiver given the opportunities for additional entrants to operate in Astro Digital's requested frequency bands. See *DigitalGlobe, Inc.*, Order and Authorization, 20 FCC Red 15696, 15699 (Sat. Div., Int'l Bur. 2005).

12. Astro Digital's request for a waiver of the default service rules in 47 CFR 25.217(b) is granted. The Commission has not adopted band specific rules for EESS NGSO operations in the 25.5-27.0 GHz band and has waived the default service rules where EESS operators comply with Part 2 of the Commission's rules and applicable ITU rules. Astro Digital must comply with technical requirements in Part 2 of the Commission's rules and the above-referenced power flux-density limits, which should prevent harmful interference to other operations in these bands.

13. Astro Digital must coordinate physical operations of spacecraft with any operator using similar orbits, for the purpose of eliminating collision risk and minimizing operational impacts. The orbital parameters specified in this grant are subject to change based on such coordination.

14. Upon receipt of a conjunction analysis from the Joint Space Operations Center (JSpOC) or other source, Astro Digital must review the warning and take all possible steps to assess and, if necessary, to mitigate collision risk, including, but not limited to: contacting the operator of any active spacecraft involved in such warning; sharing ephemeris data and other appropriate operational information with any such operator; modifying spacecraft attitude and/or operations.

15. This authorization will become null and void if, at any time during the license term, none of the authorized satellites is operating.

16. Astro Digital has fulfilled milestone and bond obligations imposed as conditions to a previous grant of authority to operate a Landmapper-BC satellite. See IBFS File No. SAT-LOA-20170508-00071 (grant stamped Dec. 14, 2017). Because of the need for Astro Digital to continuously replenish its satellite constellation within the duration of its license term, we will not impose additional milestones or bond conditions in connection with this license modification. We find that warehousing concerns are addressed in this situation through the imposition of condition 15 above.

17. Astro Digital must deploy the space stations authorized under this grant no later than October 31, 2020. No authority is granted to deploy space stations after October 31, 2020. The scope of this authorization will be reduced automatically, without further Commission action, to the number of space stations deployed by October 31, 2020.

ATTACHMENT TO GRANT
Astro Digital U.S., Inc.
IBFS File No. SAT-LOA-20170508-00071

18. The license term for Astro Digital's constellation is 15 years and expires on 15 years from launch date of the Landmapper-BC satellite launched on January 12, 2018 (*i.e.*, January 12, 2033).

Licensee/grantee is afforded thirty (30) days from the date of release of this action to decline the grant as conditioned. Failure to respond within this period will constitute formal acceptance of the grant as conditioned.

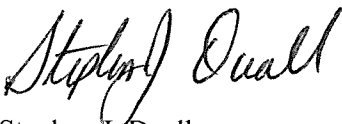

This action is taken pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 CFR § 0.261, and is effective upon release.

Station licenses are subject to the conditions specified in Section 309(h) of the Communications Act of 1934, as amended, 47 U.S.C. § 309(h).

Action Date:	August 1, 2018

26. TYPE OF EARTH STATION FACILITY: Not Applicable

PURPOSE OF MODIFICATION

27. The purpose of this proposed modification is to: (Place an "X" in the box(es) next to all that apply.) Not Applicable

ENVIRONMENTAL POLICY

28. Would a Commission grant of any proposal in this application or amendment have a significant environmental impact as defined by 47 CFR 1.1307? If YES, submit the statement as required by Sections 1.1308 and 1.1311 of the Commission's rules, 47 C.F.R. §§ 1.1308 and 1.1311, as an exhibit to this application. A Radiation Hazard Study must accompany all applications for new transmitting facilities, major modifications, or major amendments. Yes No

ALIEN OWNERSHIP

Earth station applicants not proposing to provide broadcast, common carrier, aeronautical en route or aeronautical fixed radio station services are not required to respond to Items 30-34.

29. Is the applicant a foreign government or the representative of any foreign government?	<input type="radio"/> Yes <input checked="" type="radio"/> No
30. Is the applicant an alien or the representative of an alien?	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
31. Is the applicant a corporation organized under the laws of any foreign government?	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
32. Is the applicant a corporation of which more than one-fifth of the capital stock is owned of record or voted by aliens or their representatives or by a foreign government or representative thereof or by any corporation organized under the laws of a foreign country?	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
33. Is the applicant a corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by aliens, their representatives, or by a foreign government or representative thereof or by any corporation organized under the laws of a foreign country?	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
34. If any answer to questions 29, 30, 31, 32 and/or 33 is Yes, attach as an exhibit an identification of the aliens or foreign entities, their nationality, their relationship to the applicant, and the percentage of stock they own or vote.	OWNEXHB

BASIC QUALIFICATIONS

<p>35. Does the Applicant request any waivers or exemptions from any of the Commission's Rules? If Yes, attach as an exhibit, copies of the requests for waivers or exceptions with supporting documents.</p>	<p><input checked="" type="radio"/> Yes <input type="radio"/> No</p>
<p>36. Has the applicant or any party to this application or amendment had any FCC station authorization or license revoked or had any application for an initial, modification or renewal of FCC station authorization, license, or construction permit denied by the Commission? If Yes, attach as an exhibit, an explanation of circumstances.</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>
<p>37. Has the applicant, or any party to this application or amendment, or any party directly or indirectly controlling the applicant ever been convicted of a felony by any state or federal court? If Yes, attach as an exhibit, an explanation of circumstances.</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>
<p>38. Has any court finally adjudged the applicant, or any person directly or indirectly controlling the applicant, guilty of unlawfully monopolizing or attempting unlawfully to monopolize radio communication, directly or indirectly, through control of manufacture or sale of radio apparatus, exclusive traffic arrangement or any other means or unfair methods of competition? If Yes, attach as an exhibit, an explanation of circumstances</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>
<p>39. Is the applicant, or any person directly or indirectly controlling the applicant, currently a party in any pending matter referred to in the preceding two items? If yes, attach as an exhibit, an explanation of the circumstances.</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>

40. If the applicant is a corporation and is applying for a space station license, attach as an exhibit the names, address, and citizenship of those stockholders owning a record and/or voting 10 percent or more of the Filer's voting stock and the percentages so held. In the case of fiduciary control, indicate the beneficiary(ies) or class of beneficiaries. Also list the names and addresses of the officers and directors of the Filer.

41. By checking Yes, the undersigned certifies, that neither applicant nor any other party to the application is subject to a denial of Federal benefits that includes FCC benefits pursuant to Section 5301 of the Anti-Drug Act of 1988, 21 U.S.C. Section 862, because of a conviction for possession or distribution of a controlled substance. See 47 CFR 1.2002(b) for the meaning of "party to the application"; for these purposes. Yes No

42a. Does the applicant intend to use a non-U.S. licensed satellite to provide service in the United States? If Yes, answer 42b and attach an exhibit providing the information specified in 47 C.F.R. 25.137, as appropriate. If No, proceed to question 43. Yes No

42b. What administration has licensed or is in the process of licensing the space station? If no license will be issued, what administration has coordinated or is in the process of coordinating the space station?

43. Description. (Summarize the nature of the application and the services to be provided). (If the complete description does not appear in this box, please go to the end of the form to view it in its entirety.)

Applicants seeks authority to launch and operate an Earth-Exploration Satellite Service system.

EXHIB43

43a. Geographic Service Rule Certification

By selecting A, the undersigned certifies that the applicant is not subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25.

A

By selecting B, the undersigned certifies that the applicant is subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25 and will comply with such requirements.

B

By selecting C, the undersigned certifies that the applicant is subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25 and will not comply with such requirements because it is not feasible as a technical matter to do so, or that, while technically feasible, such services would require so many compromises in satellite design and operation as to make it economically unreasonable. A narrative description and technical analysis demonstrating this claim are attached.

C

CERTIFICATION

The Applicant waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. The applicant certifies that grant of this application would not cause the applicant to be in violation of the spectrum aggregation limit in 47 CFR Part 20. All statements made in exhibits are a material part hereof and are incorporated herein as if set out in full in this application. The undersigned, individually and for the applicant, hereby certifies that all statements made in this application and in all attached exhibits are true, complete and correct to the best of his or her knowledge and belief, and are made in good faith.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 0.25 – 24 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD–PERM, Paperwork Reduction Project (3060–0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060–0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104–13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.
