Washington, DC 20554

Re: *Space Exploration Holdings, LLC, IBFS File No. SAT-LOA-20170726-00110*

Dear Ms. Dortch:

Earlier this year, the Commission authorized Space Exploration Holdings, LLC (“SpaceX”) to construct, deploy, and operate a non-geostationary orbit satellite system using Ku- and Ka-band spectrum.<sup>1</sup> However, the Commission has deferred consideration of SpaceX’s request with respect to the 29.3-29.5 GHz band. After reviewing this authorization in light of our evolving constellation deployment plans, SpaceX has concluded that it no longer seeks to pursue operations in that band at this time. Accordingly, SpaceX hereby withdraws the portion of the above referenced application that relates to the 29.3-29.5 GHz band.

If you have any questions, please do not hesitate to contact me.

Respectfully submitted,

William M. Wiltshire  
*Counsel to SpaceX*
