Marissa,

The statement in your 11/19/21 message below is an accurate description.

Thanks.

Bob

Subject: Clarification re: ICEYE US 11.17.21 Consolidated Response
Importance: High

Bob:

Thank you for the November 17, 2021 response from ICEYE to the Satellite Division questions posed earlier this week. We have one request for clarification regarding ICEYE's response to Question 1, as follows:

Is the following statement an accurate description of the ICEYE US satellite operations - yes or no?

40% of initial fuel will be reserved for orbit lowering at end of life, as well as to perform collision avoidance during this orbit lowering phase.

Please feel free to respond directly to this email, and we will upload the exchange into the record for IBFS File Nos. SAT-LOA-20210212-00021; SAT-AMD-20210831-00119.

Regards,

Merissa
