RE: L/Q Licensee, Inc., File No. 90-SAT-ML-96

Dear Mr. Caton:

On March 8, 1996, L/Q Licensee, Inc. ("LQL"), filed the above-referenced application to modify the authorization for the Globalstar™ low-earth orbit satellite telecommunications system. It has recently come to the attention of LQL that the figure for the estimated payload power in Table 2 of that filing is incorrect.

The estimated payload power should read 550 Watts (instead of 346 Watts). Taking this correction into account, the system total for the power budget in Table 2 should read 752 Watts (instead of 548 Watts).

Please associate the original and nine copies of this letter with the previously-filed copies of the application. Should there be any questions regarding this matter, please communicate with this office.

Respectfully submitted,

William D. Wallace

Attorney for L/Q Licensee, Inc.

William F. Caton
