FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20541

Ms. Magalie Roman Salas, Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

**Re: Certification of Completion of Earth Station Construction and
Commencement of Operation, File No. SES-LIC-19990625-01709, Call Sign
E990291; Certification of Successful Launch of Space Stations and
Compliance with Terms and Conditions of Authorization, File No. SAT-
MOD-19981211-00099**

Dear Ms. Salas:

Pursuant to Section 25.133 of the Federal Communications Commission's ("Commission's") Rules, Sirius Satellite Radio Inc. ("Sirius") certifies that it has completed construction and begun operations of its S-band transmit/receive earth station with call sign E990291. The Commission granted Sirius a license to operate this earth station on March 20, 2001. The facility has been completed as authorized, including the gain patterns specified in Section 25.209, and each antenna facility has been tested. Sirius will continue operation of this earth station during its license period, and if it does not continue operation it will submit the license for cancellation.

Furthermore, pursuant to Section 25.121 of the Commission's Rules and the terms of its license, Sirius also certifies that its three space stations have been successfully placed into orbit and that the operations of the satellites fully conform to the terms and conditions of Sirius's space station system authorization (as initially issued on October 10, 1997 and modified on March 9, 2001).

Respectfully Submitted,

Patrick Donnelly
Executive Vice President, General Counsel and Secretary
