**Application of Intelsat LLC
To Modify Authorization**

Intelsat LLC ("Intelsat") hereby submits the following request for modification of a space station authorization to permit relocation pursuant to a deployment plan change. Specifically, Intelsat requests authority from the Federal Communications Commission ("Commission" or "FCC") to make the following modification to its authorization for the satellite listed below:

1. **INTELSAT 602 (S2389)**, File Nos. SAT-A/O-20000119-00003; **SAT-MOD-20011221-00141; SAT-AMD-20021015-00229**. Intelsat requests modification of its license to relocate INTELSAT 602 from 32.9° E.L. to 29.5° W.L. Intelsat plans to start the relocation of INTELSAT 602 in May/June 2003 and have the satellite at the 29.5° W.L. location in August/September 2003.

As explained in the following sections, grant of the instant modification will serve the public interest by enabling Intelsat to implement deployment plan changes to respond to customer demands and ensure continuity of service. The requested modification will not adversely affect any party, and the number of orbital locations

assigned to Intelsat will not increase.

In accordance with the requirements of Section 25.117(d) of the Commission's Rules, 47 C.F.R. § 25.117(d), a completed FCC Form 312 is attached for each modification.

I. BACKGROUND

On August 8, 2000, the Commission granted Intelsat authority to operate 17 in-orbit C-band and Ku-band satellites then owned and operated by the International Telecommunications Satellite Organization ("INTELSAT"). The Commission also granted Intelsat authority to construct, launch and operate 10 planned satellites. The authorization also allowed Intelsat to relocate, among 22 orbit locations, certain currently operating satellites upon the launch of the 10 planned satellites.¹

As explained in Intelsat's initial application, in order to accomplish its diverse missions, the Intelsat system is a dynamic system that is quick to respond to business demands and customer needs. To this end, Intelsat regularly relocates its satellites to

¹ See *Applications of Intelsat LLC for Authority to Operate and to Further Construct, Launch, and Operate C-Band and Ku-Band Satellites that Form a Global Communications System in Geostationary Orbit*, 15 FCC Rcd 15460 (2000) (Memorandum Opinion Order and Authorization), *recon. denied*, 15 FCC Rcd 25234 (2000) (Order on Reconsideration).

optimize satellite usage, satisfy customer requirements and maximize the utilization of orbital resources.²

The instant application for modification of the INTELSAT 602 license is the result of further evaluation and refinement of Intelsat's satellite deployment plan to meet its customers' needs. The requested modification is fully described below.

II. PROPOSED MODIFICATION

INTELSAT 602 is currently authorized and operates at the 32.9° E.L. location.³ Intelsat now requests modification of its license to relocate INTELSAT 602 from its current location to 29.5° W.L. Intelsat plans to start the relocation of INTELSAT 602 in May/June 2003 and have it at the new location in August/September 2003. At its new location, INTELSAT 602 will operate in the inclined orbit mode.

² See, e.g., *Application of Intelsat LLC to Modify Authorizations to Operate, and to Further Construct, Launch, and Operate C-band and Ku-band Satellites that Form a Global Communications System in Geostationary Orbit*, 16 FCC Rcd 16208 (2001) (Order and Authorization).

³ *Application of Intelsat LLC, Further Amendment to Application to Modify Authorization to Operate, and to Further Construct, Launch and Operate C-band and Ku-band Satellites that Form a Global Communications System in Geostationary Orbit*, File Nos. SAT-MOD-20011221-00141; SAT-AMD-20021015-00229 (filed Oct. 15, 2002) (stamp grant from Jennifer Gilsonan, FCC provided on Dec. 30, 2002 with attached conditions).

III. PUBLIC INTEREST SHOWING

The proposed modification in Intelsat's deployment plan will serve the public interest. Not only will the modification promote efficient use of the orbital arc, it will also provide Intelsat with the flexibility needed to manage its system and meet the needs of its customers.

The Commission has traditionally provided licensees with the flexibility to adjust to changed circumstances and best serve their customers' needs. In particular, licensees are routinely permitted to re-locate satellites in order to maximize their efficient use of orbital resources. For example, in approving AMSC's 1998 request to relocate one of its satellites, the Commission stated that licensees are "in a better position" to determine how to tailor their systems "to meet the particular needs of [their] customers."⁴ As a result, the Commission further explained, "the Commission will generally grant a licensee's request to modify its system, provided there are no compelling countervailing public interest considerations."⁵

The instant modification application is fully consistent with this policy. Intelsat simply proposes to respond to customer needs by relocating a satellite to a different location. Importantly, the modification contemplated herein does not change the number or identity of the orbital locations previously authorized for use by Intelsat or available for assignment to other applicants. In addition, Intelsat will operate INTELSAT 602 at

⁴ See *AMSC Subsidiary Corporation*, 13 FCC Rcd 12316, 12318 (1998) (Order and Authorization).

⁵ *Id.*

the new location in accordance with coordination agreements with nearby operators.

Therefore, the proposed modification will not give rise to any coordination difficulties.

Most importantly, the proposed modification will ensure continuity of service to Intelsat's customers, as well as provide service to new customers that desire such service. Some of these customers are in small and developing countries for which the Intelsat system continues to be the primary or sole source of international connectivity. Prompt grant of the instant application will ensure that there is no disruption in service on these and other routes currently served by Intelsat.

IV. CONCLUSION

For the reasons explained in the previous sections, Intelsat requests modification of its authorization for INTELSAT 602 to permit implementation of the changes in the deployment plan described herein.

Respectfully submitted,

Intelsat LLC

INTELSAT 602 MODIFICATION

EXHIBIT I

Technical Description and Other Information Required Under Section 25.114(c)

The Applicant, Intelsat LLC, hereby applies for authority to relocate INTELSAT 602 from 32.9° E.L. to 29.5° W.L. and to continue to operate in the C-band and Ku-band at that orbital location.

Specific technical information for the INTELSAT 602 satellite, as required by Section 25.114 (c) of the Commission's rules, is presented below.

NAME AND ADDRESS OF APPLICANT

The Applicant is:

Intelsat LLC
3400 International Drive, N.W.
Washington, D.C. 20008-3098
(202) 944-6800

NAME AND ADDRESS OF CONTACT PERSONS

The contact person for the Applicant is:

Correspondence and communications concerning this application should be addressed to the aforementioned contact person with copies to the above Counsel.

TYPE OF AUTHORIZATION REQUESTED

This application requests FCC authority to relocate and continue to operate a satellite in the Fixed Satellite Service operating in the C-band and Ku-band. Intelsat LLC seeks authority for INTELSAT 602 to operate on both a common carrier and non-common carrier basis.

TECHNICAL INFORMATION

A. Satellite Coverage

Information regarding the coverage of the INTELSAT 602 satellite is provided in Attachment 1.

WAIVERS REQUESTED

It is requested that the waivers granted to the INTELSAT 602 spacecraft at the 32.9° E. L. location continue to apply at the 29.5° W.L. location.

PUBLIC INTEREST CONSIDERATIONS

A detailed statement regarding the public interest considerations supporting the grant of this application can be found in Part 1 of this application.

ENGINEERING CERTIFICATE

The Engineering Certificate supporting the technical information contained in this application is attached.

ENGINEERING CERTIFICATE

I hereby certify that I am the technically qualified person responsible for the preparation of the engineering information contained in the technical portions of the foregoing application, that I am familiar with Part 25 of the Commission's rules and that the technical information is complete and accurate to the best of my knowledge and belief.
