Attachment

With this grant, we conclude that the Part 25 waivers granted in the original licensing order for the INTELSAT 906 satellite at the 18.0° W.L. location¹ are transferable to the modified location, 27.5° W.L., on the basis that:

- a) the Part 25 waivers granted for the INTELSAT 906 satellite at the original location, 18.0° W.L, are identical to the Part 25 waivers the International Bureau granted in the original licensing order for INTELSAT 905 at 27.5° W.L. and;
- b) both the INTELSAT 906 and INTELSAT 905 satellites have technically identical characteristics.²

With this grant, we also authorize Intelsat to drift the INTELSAT 906 satellite from the 18.0° W.L. location to the 27.5° W.L. location subject to the following conditions:

- 1) During the drift of the satellite from 18.0° W.L. to 27.5° W.L, Intelsat LLC shall not operate the communications payload on INTELSAT 906; and
- 2) Intelsat shall coordinate its telemetry, tracking and control (TT&C) operations with existing geostationary satellites to ensure that no unacceptable interference results from Intelsat's TT&C operations during its drift operations; and
- 3) Any actions taken as a result of the drift authority ARE SOLELY AT INTELSAT LLC'S OWN RISK.

¹ See *Applications of Intelsat LLC For Authority to Operate, and to Further Construct, Launch and Operate C-Band and Ku-Band Global Satellites That Form a Global Communications System in Geostationary Orbit*, 15 FCC Rcd 15460, Appendix C (2000).

² See Letter from Jennifer D. Hindin, Counsel for Intelsat LLC, to William F. Caton, Acting Secretary, FCC (March 19, 2002) (confirming that the technical characteristics of the INTELSAT 9 series satellites launched or to be launched into orbital locations originally authorized for other INTELSAT 9 series satellites are the same as the technical characteristics as the INTELSAT 9 series satellites originally licensed for those locations).
