**Applications of Intelsat LLC
To Modify Authorization**

Intelsat LLC ("Intelsat") hereby submits the following request for modification of a space station authorization to permit relocation pursuant to a deployment plan change. Specifically, Intelsat requests authority from the Federal Communications Commission ("Commission" or "FCC") to make the following modification to its authorization for the satellite listed below:

1. **INTELSAT 709** (S2396), File Nos. SAT-A/O-20000119-00010; SAT-MOD-2002041800065. Intelsat requests modification of its license to relocate INTELSAT 709 from 55.35° W.L. to 85.15° E.L. Intelsat plans to start the relocation of INTELSAT 709 in May/June 2003 and have the satellite at the 85.15° E.L. location in July/August 2003.

As explained in the following sections, grant of the instant modification will serve the public interest by enabling Intelsat to implement deployment plan changes to respond to customer demands and ensure continuity of service. The requested modification will not adversely affect any party, and the number of orbital locations assigned to Intelsat will not increase.

In accordance with the requirements of Section 25.117(d) of the Commission's Rules, 47 C.F.R. § 25.117(d), a completed FCC Form 312 is attached for this modification.

I. BACKGROUND

On August 8, 2000, the Commission granted Intelsat authority to operate 17 in-orbit C-band and Ku-band satellites then owned and operated by the International Telecommunications Satellite Organization ("INTELSAT"). The Commission also granted Intelsat authority to construct, launch and operate 10 planned satellites. The authorization also allowed Intelsat to relocate, among 22 orbit locations, certain currently operating satellites upon the launch of the 10 planned satellites.¹

As explained in Intelsat's initial application, in order to accomplish its diverse missions, the Intelsat system is a dynamic system that is quick to respond to business demands and customer needs. To this end, Intelsat regularly relocates its satellites to

¹ See *Applications of Intelsat LLC for Authority to Operate and to Further Construct, Launch, and Operate C-Band and Ku-Band Satellites that Form a Global Communications System in Geostationary Orbit*, 15 FCC Rcd 15460 (2000) (Memorandum Opinion Order and Authorization), *recon. denied*, 15 FCC Rcd 25234 (2000) (Order on Reconsideration).

optimize satellite usage, satisfy customer requirements and maximize the utilization of orbital resources.²

The instant application for modification of the INTELSAT 709 license is the result of further evaluation and refinement of Intelsat's satellite deployment plan to meet its customers' needs. The requested modification is fully described below.

II. PROPOSED MODIFICATIONS

INTELSAT 709 is currently authorized and operates at the 55.35° W.L. location.³ Intelsat now requests modification of its license to relocate INTELSAT 709 from its current location to 85.15° E.L. Intelsat plans to start the relocation of INTELSAT 709 in May/June 2003 and have the satellite at the new location in July/August 2003.

III. PUBLIC INTEREST SHOWING

The proposed modification in Intelsat's deployment plan will serve the public interest. Not only will the modification promote efficient use of the orbital arc, it will

² See, e.g., *Application of Intelsat LLC to Modify Authorizations to Operate, and to Further Construct, Launch, and Operate C-band and Ku-band Satellites that Form a Global Communications System in Geostationary Orbit*, 16 FCC Rcd 16208 (2001) (Order and Authorization).

³ *Applications of Intelsat LLC to Modify Authorizations to Operate, and to Further Construct, Launch and Operate C-band and Ku-band Satellites that Form a Global Communications System in Geostationary Orbit*, File No. SAT-MOD-20020418-00065 (filed Apr. 18, 2002) (stamp grant from Jennifer Gilsonen, FCC, provided on Oct. 4, 2002 with attached conditions).

also provide Intelsat with the flexibility needed to manage its system and meet the needs of its customers.

The Commission has traditionally provided licensees with the flexibility to adjust to changed circumstances and best serve their customers' needs. In particular, licensees are routinely permitted to re-locate satellites in order to maximize their efficient use of orbital resources. For example, in approving AMSC's 1998 request to relocate one of its satellites, the Commission stated that licensees are "in a better position" to determine how to tailor their systems "to meet the particular needs of [their] customers."⁴ As a result, the Commission further explained, "the Commission will generally grant a licensee's request to modify its system, provided there are no compelling countervailing public interest considerations."⁵

The instant modification application is fully consistent with this policy. Intelsat simply proposes to respond to customer needs by relocating a satellite to a different location. Importantly, the modification contemplated herein does not change the number or identity of the orbital locations previously authorized for use by Intelsat or available for assignment to other applicants. In addition, Intelsat will operate INTELSAT 709 at the new location in accordance with coordination agreements with nearby operators. Therefore, the proposed modification will not give rise to any coordination difficulties.

Most importantly, the proposed modification will ensure continuity of service to Intelsat's customers, as well as provide service to new customers that desire such service.

⁴ See *AMSC Subsidiary Corporation*, 13 FCC Rcd 12316, 12318 (1998) (Order and Authorization).

⁵ *Id.*

Some of these customers are in small and developing countries for which the Intelsat system continues to be the primary or sole source of international connectivity. Prompt grant of the instant application will ensure that there is no disruption in service on these and other routes currently served by Intelsat.

IV. CONCLUSION

For the reasons explained in the previous sections, Intelsat requests modification of its authorization for INTELSAT 709 to permit implementation of the change in the deployment plan described herein.

Respectfully submitted,

Intelsat LLC
