Re: Further Amendment to Application of Intelsat LLC To Modify
 Authorization for INTELSAT 706; Call Sign: S2401; File Nos. SAT-
 MOD-20040730-00152 and SAT-AMD-20040903-00165

Dear Ms. Dortch:

On October 28, 2004, the International Bureau granted the above-referenced requests of Intelsat LLC ("Intelsat") for modification of its license to operate the INTELSAT 706 at 50.25° E.L.¹ Condition 8 of the grant required Intelsat to "prepare and submit to the Federal Communications Commission, within fifteen days following grant of this authorization, the necessary materials for submission to the ITU, pursuant to Article 8.4 of the Radio Regulations, in connection with the operations of the NTELSAT 706 satellite at the 50.25° E.L. orbital location." Intelsat, by its attorneys, hereby submits the attached requested materials.

Should you have any questions, please do not hesitate to contact Humberto Henriques of Intelsat at 202-944-7541 or me.

Sincerely,

Jennifer D. Hindin

¹ See *Policy Branch Information, Actions Taken*, Public Notice, Rept. No. SAT-00253 (Oct. 29, 2004).

CONDITION 8 ITU TEXT

The Administration of the United States of America would like to inform the ITU that a U.S. licensed satellite, INTELSAT 706, has been authorized to provide services in the C- (3700-4200/5925-6425 MHz) and Ku-bands (10.95-11.2, 11.45-11.7, 11.7-11.95, 12.5-12.75, 14.0-14.5 GHz) within its designated service areas from the 50.25° E.L. geostationary orbit location.

The satellite will be operated in accordance with the Table of Frequency Allocations of the Radio Regulations.

Intelsat has demonstrated that the intended operations will not cause potential excess interference to other adjacent operating satellite systems. However, these operations have been authorized only under the Radio Regulatory provision 4.4.

This information is being submitted for its possible relevance to the provisions of Article 8 of the Radio Regulations.
