LightSquared Subsidiary LLC
IBFS File Nos. SAT-MOD-20100405-00064, SAT-AMD-20100908-00191
Call Sign: S2358

The application of LightSquared Subsidiary LLC (LightSquared),¹ IBFS File No. SAT-MOD-20100405-00064, as amended by SAT-AMD-20100908-00191, to modify its authorization to operate the SkyTerra-1 space station (Call Sign: S2358) at 101.3° W.L. by extending the deadline for launch and commencement of operations from May 26, 2010, to January 31, 2011, IS GRANTED.² This authorization is granted in accordance with the specifications set forth in LightSquared's application and the Federal Communication Commission's (Commission) rules, and is subject to the following conditions:

1. LightSquared shall comply with all terms and conditions of the authorization for the SkyTerra-1 space station adopted in *Mobile Satellite Ventures Subsidiary LLC*, Order and Authorization, DA 05-1492 (Int'l Bur. 2005), unless explicitly waived or modified by the Commission.
2. LightSquared's request for waiver of Section 25.283(c) of the Commission's rules, 47 C.F.R. § 25.283(c), IS GRANTED. Section 25.283(c) requires discharge of all stored energy sources when a space station is retired from service. SkyTerra-1 is a Boeing 702 model spacecraft, which has a liquid propulsion system. The fuel and oxidizer tanks will be vented in the end-of-life shutdown procedure. Two helium pressurant tanks, which are designed to leak before burst, will be sealed by firing pyrotechnic valves shortly after launch. LightSquared states that each helium tank has an enclosed volume of 68.8 liters and estimates that the mass and pressure of residual helium in each tank will be 719 grams and 860 psi, respectively, at end-of-life. LightSquared also states that the tanks' designed burst pressure is 5,249 psi, and that the interconnected components of the liquid propulsion system have been pressure tested to 4,000 psi. The information submitted is not sufficient to support a finding that the underlying purpose of Section 25.283(c) would be served by sealing the helium tanks without completely venting them. However, given the imminent scheduled launch of SkyTerra-1, we grant a partial waiver of the rule because undue hardship would result from requiring modification of the space station prior to launch. This action is without prejudice to possible future license requirements in connection with other spacecraft of the same manufacturing series.
3. This action is taken pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106 and 1.115, may be filed within 30 days of the date of the public notice announcing this action.

PURPOSE OF MODIFICATION

27. The purpose of this proposed modification is to: (Place an 'X' in the box(es) next to all that apply.)

- a --- authorization to add new emission designator and related service
- b --- authorization to change emission designator and related service
- c --- authorization to increase EIRP and EIRP density
- d --- authorization to replace antenna
- e --- authorization to add antenna
- f --- authorization to relocate fixed station
- g --- authorization to change frequency(ies)
- h --- authorization to add frequency
- i --- authorization to add Points of Communication (satellites & countries)
- j --- authorization to change Points of Communication (satellites & countries)
- k --- authorization for facilities for which environmental assessment and radiation hazard reporting is required
- l --- authorization to change orbit location
- m --- authorization to perform fleet management
- n --- authorization to extend milestones
- o --- Other (Please specify)

ENVIRONMENTAL POLICY

28. Would a Commission grant of any proposal in this application or amendment have a significant environmental impact as defined by 47 CFR 1.1307? If YES, submit the statement as required by Sections 1.1308 and 1.1311 of the Commission's rules, 47 C.F.R. 1.1308 and 1.1311, as an exhibit to this application. A Radiation Hazard Study must accompany all applications for new transmitting facilities, major modifications, or major amendments.
