JUN 16 2011

FCC Mail Room

Subject: In the Matter of LightSquared Subsidiary LLC Request for Modifications of its Authority for an Ancillary Terrestrial Component; SAT-MOD-20101118-00239

Dear Secretary Marlene H. Dortch,

I would like to ask you to please support the Federal Communications Commission's working group assembled to resolve issues dealing with LightSquared, Inc.'s efforts to build a 4G-LTE nationwide broadband wireless network. Given our nation's need for expanded broadband capacity and access, this privately funded project seems worthy of review and a process that brings all interested parties together.

I have reviewed literature available in the public domain that indicates LightSquared's business model as a wholesale, rather than retail, company will enable sorely needed competition like never before in the wireless market.

Consumers will benefit the most because LightSquared will ease bandwidth limitations, allow for the introduction of new devices, and facilitate more competitors to enter the wireless market, lowering prices.

Please consider the benefits LightSquared can offer the country as a whole and to our state in particular, and please support the company's efforts to work with the FCC and other interested parties to bring this exciting new nationwide wireless network to the country.

Sincerely,

GILBERT CEDILLO  
Assemblymember, 45<sup>th</sup> District
