Subject: In the Matter of LightSquared Subsidiary LLC Request for Modification of
its Authority for an Ancillary Terrestrial Component;SAT-MOD-20101118-00239

Dear Secretary Dortch,

Web based communication has become a vital part of American life influencing how
we learn,work,play and conduct business. That's why all families and independent
businesses should have access to broadband service reliable and affordable.

The company LightSquared will ensure that consumers have fast,reliable connectivity
regardless of location. By 2015,LightSquared expects to cover at least 92 percent
of people in the U.S. with its wireless broadband network. This expansion will
increase competition and lead to more affordable broadband access.

Small business owners need the internet for an array of daily activities,including
marketing and communication with clients. Those who are unable to get affordable
internet access forego valuable opportunities and potential revenue.

My business utilizes broadband resources to market our flooring products to contractors
builders and the general public. Through web based communication customers can access
company background,prices,specials,and product reviews. Also potential customers
can contact us to schedule a consultation. Increased broadband access for the public
would increase the potential online marketplace for my company and our products.

An increase in the broadband system would ensure that entrepreneurs,including small
businesses like mine,have affordable access to broadband for running their business
on a day to day basis. I support LightSquared in their efforts to increase universal
broadband access.

Sincerely,

John McGowan,President
Key Carpet Corporation
