Subject: In the Matter of LightSquared Subsidiary LLC Request for Modification of its Authority for an Ancillary Terrestrial Component; SAT-MOD-20101118-00239

I am contacting you regarding a company named LightSquared, which is seeking to roll out a new wireless network across the country, including Chicago area. I believe high-speed wireless has become an essential technology for modern-day life, particularly for businesses that want to remain competitive.

As a financial consultant in the Chicago area I rely upon broadband services to monitor markets and identify trends in the financial industry. I rely upon to web based communications for the management of my customer's portfolios and I utilize broadband communication to market to new customers.

I hope you agree that one of our nation's top priorities should be making sure that broadband is accessible by every business, family and individual. And I hope you will support LightSquared's desire to invest in its new network, which will provide competition and choice in the broadband market.

I understand that the Federal Communications Commission has started a process to resolve issues surrounding LightSquared's plans and the GPS industry. Please support this process and work to remove the hurdles standing between LightSquared and its potential national broadband wireless network.

Thank you.

Sincerely,
