

Exhibit 2

RESPONSE TO QUESTION 34: ALIEN OWNERSHIP

The Communications Act does not restrict foreign ownership of satellite authorization holders that operate on a non-common carrier basis. *See* 47 U.S.C. § 310(b). GeoEye License Corp. will operate GeoEye-2 on a non-common carrier basis, consistent with authority previously granted by the Commission.¹ Accordingly, GeoEye License Corp. has entered “N/A” for each of Questions 30 through 33 on the FCC Form 312 submitted herewith.

¹ *Orbital Imaging Corp.*, Order and Authorization, 14 FCC Rcd 2997, at ¶ 13 (IB 1999) (granting ORBIMAGE’s “request that it be regulated as a non-common carrier”).
