The application of DG Consents Sub, Inc., IBFS File No. SAT-MOD-20120710-00111, for modification of its Earth Exploration Satellite Service space station license, Call Sign S2129, to add authority to launch and operate a fourth non-geostationary-orbit remote-sensing space station, WorldView-3, IS GRANTED. Specifically, WorldView-3 is authorized to transmit remote-sensing data and telemetry signals in the 8025-8400 MHz frequency band from a circular orbit with altitudes between 496 and 830 kilometers, depending on the launch vehicle used, and with inclination between 97.36 degrees and 98.7 degrees, and to continue telemetry transmissions in the 8025-8400 MHz (space-to-Earth) frequency band at altitudes below 496 kilometers during the decommissioning phase. WorldView-3 is also authorized to operate on a center frequency of 2085.6875 MHz to receive command signals. Operations under this authorization must be in accordance with the technical specifications in the above-referenced application and the Federal Communications Commission's rules except as waived herein, and are subject to the following conditions:

1. Power flux-density from operation of WorldView-3 in the 8025-8400 MHz band must not exceed the limits in No. 22.5 or Table 21-4 of the International Telecommunication Union's Radio Regulations or the limits in ITU-R Recommendation SA-1157. 3.
2. Given the opportunity for additional entrants to operate in the 8025-8400 MHz band, we grant DG Consent's request for waiver of the modified processing round requirements of 47 C.F.R. §§ 25.156 and 25.157. *See DigitalGlobe, Inc., Order and Authorization, 20 FCC Rcd 15696 (Sat. Div., Int'l Bur. 2005), at Paragraph 8.*
3. Because DG Consents must comply with the requirements of footnote US258 to the Table of Frequency Allocations and the above-referenced power flux-density limits, which should prevent harmful interference to other operators in the band, we grant its request for a waiver of the default service rules in 47 C.F.R. § 25.217(b). *See DigitalGlobe, Inc., supra, at Paragraph 15.*
4. Unless extended by the Commission for good cause shown, this authorization shall become null and void in the event the WorldView-3 space station is not constructed and launched in accordance with this application pursuant to the schedule in Section 25.164(b) of the Commission's rules.
  - a. Enter into a binding non-contingent construction contract by January 24, 2014.
  - b. Complete the Critical Design Review by January 24, 2015.
  - c. Begin construction by June 24, 2016.
  - d. Launch and begin operation by June 24, 2016.
5. Nothing in this authorization extends the license term for Call Sign S2129, which will expire on October 8, 2024. *See IBFS File No. SAT-MOD-20070730-00107.*

**Call Sign S2129**

6. Within 30 days after the launch of WorldView-3, DG Consents must file a notification with the Commission specifying its apogee and perigee altitudes and orbital inclination.

7. DG Consents is afforded 30 days from the date of release of this authorization to decline this authorization as conditioned. Failure to respond within this period will constitute formal acceptance of the authorization as conditioned.

8. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106 and 1.115, may be filed within 30 days of the date of the public notice indicating that this action was taken.
